Explore The Latest Technology in Digital Solutions

- AI capabilities in exocad
- True Smile realism
- Advantages in photogrammetry
- Seamless scan to print workflow
- Tips to overcome challenges

SPEAKER BIO

Alex Chabachevitch is an experienced and successful owner of a medium sized dental lab in the GTA. He has over 20 years of experience managing his lab. The main focus of his workflow being on implantology, crowns, bridges, digital dentistry including digital dentures. Alex is also a partner in Unique Dental Supplies Inc.

Mark Chan

DD

DENTAURUM
1886

9:55 AM - 10:50 AM

The Remanium Standard Elevating Success Through Elite LMF Powder Performance

Step into the fast-paced world of Laser Metal fusing and gain knowledge on how LMF is reshaping digital dentistry. This dynamic program invites you to explore the science behind Dentaurum's premium metal powders, and smart digital workflows coming together to create high-precision dental frameworks.

Gain insight into Powder parameters that ensure consistent performance and learn why Dentaurum's Remanium® star and Rematitan® powders are the highest of industry standards.

Watch it come alive through advanced technologies while we dive into the digital workflow for manufacturing removable partial denture (RPD) frameworks.

Expect practical insights, real-world applications, and plenty of "aha" moments.

Whether you're curious about Laser Melting manufacturing or ready to level up your standard, this experience is designed to inspire, inform, and energize.

SPEAKER BIO

Mark Chan received his diploma from Denturism in Toronto at George Brown College with honours. Currently Mark is practicing in Ontario with a main focus on high-end removable and implant prosthetics. With a passion for both technical and clinical techniques he is certified in Bio-logic, BPS and SDC denture concepts and is a ZunstZhanWerk "Art of Denture" award winning Denturist, he is a sought after consultant and opinion leader in the Denturist and Lab community.

10:50 AM - 11:20 AM • Grand Villa Ballroom 3

Morning Coffee Break

Jean Chiha
MDT

kuraray

11:20 AM - 12:15 PM

Meet MiLai: The Next Generation

Discover the simplicity and versatility of the MiLai system, the next generation of stain and glaze and microlayer ceramic solutions. This lecture will provide an overview of the complete MiLai workflow, including stain and glaze, internal stains, microlayer ceramics, and paste applications. Attendees will learn how a single, streamlined system can be used across both lithium disilicate and zirconia restorations, delivering efficient workflows, predictable esthetics, and consistent results. Explore how MiLai simplifies ceramic characterization while expanding creative possibilities for modern dental technicians and clinicians.

SPEAKER BIO

Jean Chiha is the owner of North Star Dental Laboratory and Milling Center, Santa Ana, CA and has served as president of the DLAOC since 2013. He is a 1985 graduate of Institute Dento Technic, a private dental technology school in France. Chiha lectures internationally on dental communication and case planning and writes technical articles for dental magazines. Jean is the Key Opinion Leader and International Instructor/Lecturer for Kuraray Noritake and Key Opinion Leader for Exocad and Key Opinion Leader for Medit.

12:15 PM - 1:15 PM • Grand Villa Ballroom 3

Lunch

Eyal Geiger

CEO of 3D Prime Tech

1:15 PM - 2:10 PM

From Analog to Digital: A Better Way to Fabricate Partial Dentures

Discover the benefits of digital partial dentures using the latest advancements in Exocad's QuickSnap design platform and metal additive manufacturing. This lecture explores how Exocad's intuitive digital workflow seamlessly integrates with ATLIX's (TRUMPF's) cutting-edge metal printing technology to transform partial denture fabrication. Learn about ATLIX's unique metal printer features including operator safety and 80% in reduction time for post-processing. From the analog-to-digital transition through the final printed framework, learn how each step of the process works together to streamline production while delivering superior accuracy, efficiency, and repeatability.

SPEAKER BIO

Eyal Geiger is the Founder and CEO of 3D Prime Technologies Inc., a digital dental solutions company focused on service and support with a reliable and experienced team. With over 20 years of experience in advanced manufacturing and healthcare technology, Eyal has scaled businesses with a significant focus on Dental Technology Solutions. At 3D Prime, he partners with global innovators like TRUMPF, Stratasys, exocad and Oqcam to deliver end-to-end solutions in metal 3D printing, advanced resin printing, precision milling, and AI-driven workflows. His focus is on empowering labs through technology, training, and service excellence.

Kaveh Shams
DT

2:10 PM - 3:05 PM

Seeing Beyond The Surface – Bone Analysis with Zirkonzahn Modifier

Push the limits of digital dentistry with Kaveh Shams and explore a new approach to bone analysis and anatomical segmentation with the Bone Doctor module in Zirkonzahn. Modifier – one powerful CAD platform designed to expand your digital possibilities. The result: precise 3D objects generated from DICOM data, ready for accurate implant planning.

Zirkonzahn®
Human Zirconium Technology

SPEAKER BIO

Kaveh Shams graduated as a Dental Technician from Lambeth College – in London, UK, in 2010. Since then, he has worked in multiple dental laboratories in London and Toronto. In recent years, his passion for digital dentistry has led him to take responsibility as a CAD-CAM Specialist supporting and coaching dental community members across Canada. He continues serving the dental community as Zirkonzahn's ambassador and branch manager.

IPS e.max Zirconia: From Material Science to Natural Esthetics

IPS e.max Zirconia has introduced new possibilities for minimally invasive restorations, but many laboratory technicians still ask the same practical questions: How does it mill? How does it perform in speed sintering? How accurate is the shade? How thin can it be? How predictable is the bonding protocol?

Through clinical cases and hands-on laboratory testing, this lecture answers those questions by evaluating the material's milling quality, optical behavior, sintering options, infiltration liquids, shade accuracy, masking ability, ultra-thin veneer applications, and laboratory bonding protocols.

The lecture then moves beyond the material itself to explore the esthetic potential of IPS e.max Ceram Art. Can a modern staining system truly reproduce the optical complexity traditionally achieved through cut-back and layering? Through practical demonstrations, attendees will learn how surface texture, enamel effects, brightness control, dentin chroma, and predictable staining workflows can create restorations with remarkable depth and vitality while minimizing porcelain build-up.

This presentation combines material science with artistic principles, providing practical techniques that can be immediately incorporated into everyday laboratory workflows.

SPEAKER BIO

Aiham Farah, CDT, MDT, is a Certified Dental Technician specializing in dental ceramics, with many years of experience in cosmetic restorative dentistry in private lab practice. He has served as a speaker and trainer for Ivoclar in the Middle East, and is now a global consultant and key opinion leader for the company. His work has earned awards such as the "Best Esthetic Case" in MENA magazine and the "Best Contribution in Digital Dentistry Excellence," and he has taught dental technology, lectured internationally on ceramics, CAD/CAM esthetics, and dental teamwork, and published in multiple dental journals. Since 2019, Aiham has been a Consultant and National Trainer of Comprehensive Esthetics with The Aurum Group® in North America.

VITA

4:30 PM - 5:25 PM

Creativity, Material Selections and The Face, White and Pink, Lets Be Unique.

While our industrial marketing machine seems to focus on single molar dentistry laboratories and Clinicians need to understand that their ability to communicate with their dental partners on a verity of topics will help to separate them from the pack. Complex cases are more present today then ever before, Clinical teams with the knowledge of restoring these cases are in a strong position to secure their future success. Understanding restorative options is a key factor in creating a blueprint for successful case communication. Restorative material choices and the use of implants, which is the largest growth product in the dental market, have influenced our options. Today's dental teams need a solid foundation of knowledge to control case outcome and esthetic success.

Program Objectives:

- Photographic and Esthetic communication.
- Managing the White and Pink using zirconia and unique textured ceramics.
- Layer, Micro Layer and Liquid Ceramics; when where and why.
- Restorative options for implant involved cases.

SPEAKER BIO

Peter Pizzi is a dental educator with expertise across all phases of clinical and laboratory techniques—including crown and bridge, ceramics, implantology, and digital photography—and is known for his engaging lecture style.

He is the owner and manager of Pizzi Dental Studio Inc., faculty at NYU School of Dentistry, and a board member of ASMDT. He's also a Fellow of the NGS (Northeastern Gnathological Society), Editor in Chief of Inside Dental Technology, and was named ACP Technician of the Year in 2018.

Peter has lectured throughout the United States, Europe, and Asia, and continues to study with top clinicians in the field.

Material Gems for Success Driven Teeth... Know the Why?

Discover how today's restorative materials and adhesive principles are transforming clinical outcomes. In this engaging lecture, James will explore the evolution of modern dental materials, highlighting the science behind successful restorations—from design concepts and material chemistry to adhesion protocols and clinical decision-making. Attendees will gain practical insights into the critical factors that determine why restorative cases succeed or fail, leaving with evidence-based strategies they can immediately apply in practice.

SPEAKER BIO

James R. Neuber is a Registered Dental Technician with 39 years of experience specializing in Adjustment-Free Ceramic Prosthetics. A master ceramist skilled in everything from single units to full mouth reconstruction, he is also an educator in digital photography, shade records, smile design, and full mouth prosthetics, and serves as an advisor to DENTA4. James is Vice President of Ocean Ceramics Ltd. Outside of dentistry, he's a devoted husband of 32 years, an investor, and an avid alpine snowmobiler.

AI in the Denturist Clinic: Smarter Charting and Reduced Administrative Burden

Artificial Intelligence is rapidly moving from theory to day-to-day reality in healthcare clinics — including denturist practices. This one-hour continuing education session will explore how modern AI tools can support more accurate patient charting, improve after-hours patient communication, and reduce the administrative load on practitioners and staff.

Presented by Dean Fenwick, founder of DOMx and long-time practice-management advisor to denturists across Canada, this session will focus on practical, real-world applications of AI rather than technical theory. Attendees will see how AI-assisted clinical documentation can transform casual chairside or post-appointment dictation into properly structured, professional SOAP notes — improving consistency, clarity, and record quality.

The presentation will also examine the growing role of AI-based phone attendance, including how AI assistants can responsibly handle missed calls, after-hours inquiries, appointment requests, and basic triage — reducing reliance on voicemail while maintaining professionalism and patient confidence.

Special attention will be given to privacy considerations, consent, data residency, and professional accountability, with discussion tailored to the Canadian and BC regulatory environment.

This session is designed to inform, not overwhelm — helping denturists understand what is possible today, what is coming next, and how to evaluate AI tools responsibly for their own clinics.

SPEAKER BIO

Dean Fenwick is the founder of Specialized Office Systems Inc., the company behind DOMx, a leading practice management system designed specifically for denturists. A pioneer in the development of electronic claim submissions for denturists, he also taught practice management at NAIT and remains a passionate advocate for the profession, committed to helping denturist practices embrace innovation and lead the way as technology advances.

Zirconia & e.max Veneers – Handcrafted vs. Machine-Made

When it comes to creating a truly aesthetic smile, the outcome is not defined solely by the choice between e.max and zirconia.

This session explores how esthetic success is driven by the clinical foundation and highlights the key elements that set exceptional veneer cases apart from the mainstream approach, reinforcing four central ideas:

- The magic lies in the details.
- Tooth preparation is what truly holds the key to esthetic success.
- Handcrafted vs. machine-produced veneers.

The concept of going the extra mile—elevating veneer outcomes through the principles of Slow Dentistry.

This lecture is designed to equip you with the knowledge and skills needed to optimize your cases and strengthen your partnership with your dental lab.

SPEAKER BIO

Aiham Farah, CDT, MDT, is a Certified Dental Technician specializing in dental ceramics, with many years of experience in cosmetic restorative dentistry in private lab practice. He has served as a speaker and trainer for Ivoclar in the Middle East, and is now a global consultant and key opinion leader for the company. 3:30 PM - 4:30 PM

The Two Appointment Denture And Advanced Applications of The JB Tray

What if delivering a complete denture didn't mean multiple visits, repeated adjustments, and unnecessary chair time? This live Zoom presentation explores a smarter, more streamlined approach to denture fabrication using the two-appointment protocol and the JB Tray. Rather than focusing on theory, this session highlights how experienced clinicians are simplifying their workflow while achieving reliable, predictable results. You'll see how the JB Tray can be used beyond the basics helping you capture accurate records, improve fit, and reduce remakes. This course is designed to challenge traditional denture workflows and offer practical alternatives that save time for both you and your patients.
