## Course Overview

A new paradigm in minimally invasive surgery, based on diagnosis and treatment planning of questionable and hopeless molar teeth will be presented. This course will feature immediate implant placement and present current techniques for immediate management of multi-rooted teeth in both maxillary and mandibular extraction sites.

The hands-on component will provide a comprehensive overview of atraumatic molar extraction, alveolar ridge management, immediate molar implant placement and the role of implant design and its influence on initial stability. The selection of graft material, predictability and long term success will be discussed.

## Course Topics

- CBCT diagnosis and treatment planning for case selection
- Optimal implant size, design and surgical positioning
- for primary stability
- Crestal sinus elevation at maxillary extraction sites
- Bone grafting with allograft and PRF/membrane usage
- Healing abutment selection and Suturing techniques
- Managing Complications

## Hands-On Component

- Step by Step with Live Surgery video
- Case Examples
- Implant placement on custom models
