IMPLANT LOCATOR OVERDENTURES

Provide your patients
LIFE CHANGING
stability and function

Dr. Azeem Sheikh *DDS*

Andriy Khomyn *RDT, DD*

March 1st, 2024

9:00 AM - 5:00 PM

Location: Hiossen Implant Canada - Toronto

25 Royal Crest Ct Unit 205, Markham, ON L3R 9X4

7 CE Credits | AGD Subject Code: 690

\$2,495 + HST

- Are your patients suffering with loose dentures?
- Scared of AOX, but wanting to get into full arch therapy?
- Extracting teeth and WAITING?? Perform IMMEDIATE implants!
- Implant LOCATOR OVERDENTURES is the place to START!

About the Course

Whether it is an edentulous patient that is suffering with loose dentures and sore spots, or a patient that is in a position where they have to lose some or all of their teeth, implant locator overdentures can be a very costeffective and stable solution that can help improve their overall stability and function. This program will focus on both surgical and prosthetic planning and execution for both the already edentulous patient, and immediate implants for the patient requiring tooth extractions. Participants will practice flap design, implant placement, locator insertion and torquing along with full site suturing hands-on using simulated models. They will also perform the prosthetic component including denture preparation and pickup of locator housings ensuring an optimal result for the patient.

03

ALWAYS IMITATED NEVER DUPLICATED

During the last 18 years, over 6000, Canadian Dentists have participated in Dr. Gaum's 3 Day Oral Surgery for the GP Course.

We have thousands of testimonials that speak to the quality of the course and we would like to share a few.

I attended your course 2 years ago and have pulled hundreds of Wisdom Teeth since. I loved the course and credit it with my success. Thank you so much!

Dr. Stephen Schalk

When I took your course, I had not extracted a tooth in probably ten years. However, upon request by the owner of the clinic at which I was associating, I decided to review the skill once again.

I wanted to learn from the best!

I am now able to successfully and efficiently take out any tooth! Also, the surgical instruments you recommended are a pleasure to work with. I now find that I am able to efficiently, and with great confidence, remove any tooth. Thank you so much.

Dr Don Avidar

Thank you so much for sharing your knowledge and your expert tips. In just 3 days I have learned so much and gained confidence. I do not have words to express the value of this course.

Dr. Falgun Acharya

Oral Surgery for the GP

Concepts Covered

Lectures: 8:30AM to 12:30PM

- Diagnosis
- Patient management
- Pain control
- Fundamentals of rotary instrumentation
- Latest in reciprocation techniques
- State of the art carrier-based obturation

Hands-On: 1:30PM to 4:30PM

- Hands-on instrumentation and obturation

Attendees Must Bring

- 2-3 Accessed Teeth
- Loupes

Course Outline

This course will teach you which cases to treat predictably, and which cases to refer out for proper management. It introduces you to the fundamental concepts in rotary endodontics, regardless of the system you currently use. It will discuss diagnostic skills you should have to properly zero in on the patient chief complaint.

This course will reinforce the SOAP concepts in achieving proper diagnosis, and assess case difficulty and learn when to treat and to refer. Review local anesthesia techniques to help you achieve proper pain control. Cover and detail proper handling of endodontic procedure from isolation to access, canal location, instrumentation, disinfection and obturation details.

The course objectives will be for GPs to become confident in diagnosis, anesthesia, anatomy, instrumentation, irrigation and obturation.

The hands-on component will involve various Tulsa rotary systems and products.

Great emphasis will be given to diagnosis, case selection, proper anesthesia, glide path management and the efficient and safe use of reciprocation to create ideal shapes to allow proper and thorough disinfection of the canal space.

About the Speaker

Dr. Rony Dagher is an Endodontist and a fellow with the Royal College of Dentists of Canada, who maintains a private practice in Mississauga Ontario Canada.

He is a graduate from the University of Toronto with a Bachelor of Science degree and obtained his DDS from Case Western Reserve University.

He attended the Toronto General Hospital surgical residency program and practiced general dentistry for 7 years prior to enrolling and completing a specialty Master's degree in Endodontics at the University of Toronto. Dr. Dagher has served as an instructor at both the undergraduate and graduate endodontic departments at the University of Toronto. He has served as an Endodontic examiner for the Royal college of Dentists of Canada.

Dr. Dagher holds a special interest in Dental Traumatology and regenerative Endodontics. He currently lectures on many Endodontic topics including rotaries, trauma, disinfection and regeneration. He is currently a member of numerous endodontic and dental associations and societies.

INNOVATIONS IN LASER DENTISTRY

Practical Indications For Use With The Most Versatile Devices

2 Day Hands-On Dental Laser Seminar

By Dr. Scott Parker

Dr. Scott Parker

Since 1998, Dr. Parker has educated thousands of clinicians across the US and internationally. Recognized by his peers for his conservative yet progressive approach, as well as his ability to connect on a personal level, Dr. Parker's realistic manner of teaching has made him a highly regarded lecturing clinician and consultant. In addition to speaking and training, he has written or is listed on over 30 patents or patents-pending and has published articles in a variety of respected dental journals. He is an accredited member of the American Society for Dental Aesthetics and the American Academy of Cosmetic Dentistry, a member of the Education Committee of the Academy of Laser Dentistry and has a comprehensive understanding of dental lasers, aesthetics, implants, and functional reconstruction. He is a recognized subject matter expert in the laser treatment of airway disorders including non invasive treatments for snoring.

Learn how the precise interaction of fractional CO2 laser therapy facilitates a gentle yet clinically effective outcome to enhance the quality of sleep for the patient and their partner. Experience real time interaction and learn more about how to incorporate this unique technology to expand your scope beyond restorative general dentistry. Understand the fractional CO2 laser's role in snoring treatments, lowering AHI and working with co-therapies such as CPAP & appliances.

Plus a basic overview of fundamentals, physics & safety including a review of evidence based research associated with the most effective least invasive laser wavelengths in dentistry, including;

Course Objectives

A Basic Overview & Understanding of;
Laser Fundamentals, Physics & Safety

Enhance your knowledge and skills understand which laser wavelengths can be used, and how to use them for;

- Minimally Invasive General Surgeries
- Laser Implant Surgery
- Laser Peri-implantitis Treatment
- Laser Cosmetic Procedures
- Laser Assisted Periodontal Therapy
- Infant Tongue Tie Release
- Laser Hygiene Procedures
- Non-invasive Laser Snoring Treatment
- Laser Facial Aesthetics
- Practical Considerations for Use
- Profitable Revenue Growth!

CREATING BEAUTIFUL SMILES BY MASTERING COMPOSITE VENEERS

ADVANCED COMPOSITE RESTORATIONS AND VENEERS WITH DR. FAROKH ASEFZADEH

Date: **APRIL 27-28, 2024**

Price: **\$2,300^{+HST}**

CE hours: **13 CE**

Location: **SHAW LAB**

105 Bentworth Ave Unit 1, North York, ON M6A 1P6

This comprehensive **2-day** hands-on program is designed for dental professionals who want to enhance their skills and knowledge in cosmetic dentistry.

The course is aimed at providing participants with practical training in **anterior composite restorations and veneers**. You will get hands-on experience in the dental lab as well as lectures and demonstrations from Dr. Asefzadeh.

The **first day** of the course focuses on **anterior composite restorations**, where participants will learn about the materials, techniques, and principles of various anterior composite restorations. It will cover topics such as:

Basic principles of composite restorations

Practical and applicable tips for smile design, Shade selection, Creating anatomy of anterior teeth on typodonts along with layering technique, etc.

The **second day** of the course focuses on **cosmetic treatments** including **Veneers, FRC bridges and teeth whitening** where participants will learn about the preparation, design, and placement of anterior veneers. It will cover topics such as:

Veneer Indications and proper case selection, Proper composite and bonding selection for aesthetic treatments to provide long lasting retention and polish. Tooth preparation on **6 anterior teeth, etc.** Indications and contraindications of **bleaching**

Participants will have the opportunity to work on simulated models under the guidance of Dr. Asefzadeh, a renowned cosmetic dentist with years of experience in the field.

The course aims to enhance the participants' cosmetic dentistry skills, improve patient outcomes, and increase the success rates of their anterior composite and veneer restorations.

Course Objectives:

- Introduction to Anterior Composite Restorations and Composite Veneers
- Preparation for Composite Restorations and Veneer Placement
- Finishing and Polishing
- Maintenance and Repair
- Bleaching and Teeth Whitening
- FRC bridge indications
- Case Studies

**Course materials and demo instruments for hands-on will be provided to the attendees.*

Dr. Farokh Asefzadeh received his DDS and MSc in Restorative and Esthetic dentistry from Tehran University with honours and has 25 years of experience practicing cosmetic dentistry.

Past Chairman of Restorative Dept., Shahid Dental School and has won three national research awards.

He is the author of three books in Restorative Dentistry and is a very skilled and passionate lecturer and is the Instructor of International Center for Dental Education (Ivoclar Vivadent) in Iran. He was the chairman of the 9th Congress of Cosmetic & Restorative Dentistry in 2008.

IMMEDIATE MOLAR IMPLANTS

May 3rd, 2024

9:00 AM - 5:00 PM

Location: Shaw Lab

(105 Bentworth Ave Unit 1, North York, ON M6A 1P6)

7 CE Credits | AGD Subject Code: 690

\$2,195 + HST

Dr. Azeem Sheikh DDS

Course Overview

A new paradigm in minimally invasive surgery, based on diagnosis and treatment planning of questionable and hopeless molar teeth will be presented. This course will feature immediate implant placement and present current techniques for immediate management of multi-rooted teeth in both maxillary and mandibular extraction sites.

The hands-on component will provide a comprehensive overview of atraumatic molar extraction, alveolar ridge management, immediate molar implant placement and the role of implant design and its influence on initial stability. The selection of graft material, predictability and long term success will be discussed.

Course Topics

- CBCT diagnosis and treatment planning for case selection
- Optimal implant size, design and surgical positioning
- for primary stability
- Crestal sinus elevation at maxillary extraction sites
- Bone grafting with allograft and PRF/membrane usage
- Healing abutment selection and Suturing techniques
- Managing Complications

Hands-On Component

- Step by Step with Live Surgery video
- Case Examples
- Implant placement on custom models

Oral Moderate Sedation Refresher Course

7 CE as
required
by the
RCDSO

Date : Spring - 10th May, 2024 (8:30am - 4:30pm)

Fall - 27th September, 2024 (8:30am - 4:30pm)

Cost : \$699.00 + HST

(Includes breakfast, breaks and lunch, free parking)

Location : Shaw Lab

(105 Bentworth Ave Unit 1, North York, ON M6A 1P6)

AGD Subject Code : 340

Description: This course will review various topics related to oral moderate sedation in dentistry. We will review the new sedation standards of the Royal College of Dental Surgeons of Ontario (RCDSO), as well as patient assessment, patient monitoring, as well as the pharmacology of relevant medications used in sedation and dentistry. We will also outline the indications of sedation and anaesthesia in dentistry, cardiovascular and respiratory physiology, as well as medical emergency management in the dental office.

Learning Objectives: After attending this seminar, participants will have the knowledge to

- Appreciate that sedation and anaesthesia is a continuum
- Appreciate the new changes to the RCDSO Standard of Practice in the "Use of Sedation and General Anaesthesia in the Dental Office."
- Be familiar with patient monitoring and patient assessment for oral moderate sedation
- Appreciate basic cardiovascular and respiratory physiology
- Be familiar with sedative medications used in dentistry, in particular nitrous oxide and benzodiazepines
- Be familiar with local anaesthetic pharmacology and safety
- Manage medical emergencies in the dental office

Presented by:
Dr. Soheil Khojasteh

Dr. Soheil Khojasteh obtained his Bachelor of Health Sciences at McMaster University in 2010, and then he went on to complete his Doctor of Dental Surgery degree at the University of Toronto in 2014. After dental school, Soheil enrolled in the dental anaesthesiology specialty program at the University of Toronto, Faculty of Dentistry.

Soheil is a specialist in dental anaesthesia and a Diplomate of the American Dental Board of Anaesthesia. He is the immediate past President of the Ontario Dental Society of Anaesthesiology, and the current Vice President of the Canadian Academy of Dental Anaesthesiologists. He is a clinical instructor at the University of Toronto, Faculty of Dentistry, in the Department of Anaesthesia, and he has presented to his colleagues in anaesthesia and dentistry at numerous conferences. Soheil currently practices the Procedural Team Anaesthesia model, in which he provides comprehensive dental treatment to his patients under general anaesthesia and deep sedation.

YOUR OWN CUSTOMIZED VENEERS ON YOUR OWN PREPARED MODEL

COURSE DESCRIPTION

Although patients "request" veneers, many dentists "avoid" them. Finally, a comprehensive two-day program that will completely demystify this controversial and underused treatment modality. Use the porcelain veneer technique in your everyday restorative and create a new revenue stream for your practice. The program will prepare you to be able to deal from the simplest to the most challenging cases.

TESTIMONIALS

"I really enjoyed the hands-on veneer course by Dr. Ed Phillips. it was by far one of the best veneer courses I have taken. The knowledge and the practical skills and techniques I acquired at this course have given me the confidence to take on cases that I would have been hesitant to do in the past. This course gave me insights into treatment planning, case selection, patient communication, smile design and lab planning. Thank you Dr. Phillips for your valuable guidance and unique teaching strategies." - **Dr. Leyla Emami**

DAY 1 — CREATE VENEERS

8:30 AM- 12:00PM

- The Evolution of veneer technology
- Hands-on workshop for each participant
- Prepare the anterior maxillary 6 teeth utilizing various prep designs
- Take perfect impressions using the cordless technique of D&D

1:00PM – 3:30PM

- Identifying the Three Smile Patterns
- Temporize using the three B.S.C techniques

DAY 2 — BOND IN YOUR OWN CUSTOMIZED VENEERS

8:30 AM- 12:00PM

- Insertion checklist
- Bond in your own customized veneers

1:00PM – 3:30PM

- The Ten Artistic & Scientific Principles of Smile Design
- Rate a smile using the Modified Dental Aesthetic Index(MDAI)
- Clinical case presentation showing a variety of cases
- Conclusion Q and A Session

Note: Please bring your loupes with you to the course.

PARTICIPATION COURSE IN LASER DENTISTRY

American Board of Laser Dentistry Certification
2 Day Hands-On Seminar

With Dr. Robert Convissar *DDS, FAGD*

Candidates who successfully complete this course will receive a Certificate in Laser Dentistry recognized by the American Board of Laser Surgery, the only Medical Certifying Board in the world dedicated to Lasers and Light Energy in Medicine and Dentistry.

This course will comprise a basic overview of fundamentals, physics & safety including a review of practical indications for use, including:

- Non-Surgical, Surgical & Regenerative Periodontal Therapy (bloodless)
- Surgical and Restorative Implantology
- Fixed and Removable Prosthetics
- Oral Medicine/Oral Surgery/Oral Pathology
- Pediatric and Adolescent Operative Dentistry
- Endodontics
- Pedodontics/Orthodontics
- Esthetic/Cosmetic Dentistry
- Management of Periimplantitis
- Practice Management/Marketing Integration
- Non-Invasive Laser Snoring Treatments
- Laser Facial Aesthetics

Course Objectives

At the conclusion of the course, the participant:

- Will be familiar with the various wavelengths used in dentistry today
- Will understand wavelength effects on oral tissues
- Will understand their uses for specific oral diseases and pathologies found in everyday practice.
- Will be able to incorporate this knowledge into a basis for determining which laser wavelength is most appropriate for their practice

13.5 CE CREDITS

Soft Tissue Grafting with Alloderm Learning Objectives

- Diagnosis and etiology of gingival recession
- Classification of recession defects
- Anatomical factors affecting grafting outcome
- Flap approached in periodontal plastic surgery; critical elements in design and execution
- Evidence-based selection of the optimal grafting method

Day 1

- Mucogingival condition in natural dentition
 - Recession
 - Diagnoses
 - Etiology
 - Classification
- Flap approaches in periodontal plastic surgery
- Modified coronally advanced tunnel using a soft tissue replacement graft (Alloderm) for the treatment of gingival recession
 - Theoretical and hands on
 - Definition
 - Clinical recommendations
 - Surgical protocol
 - Suturing techniques
- Modified coronally advanced tunnel using a tissue replacement graft (**alloderm**) for the treatment of non- carious/ carious cervical lesions associated with recession
 - Treatment modalities for NCCL associated with gingival recession
 - When to graft
 - When to restore
 - When to graft and restore
- Modified laterally advanced tunnel for the treatment of deep recession sites (with CTG / alloderm)

Day 2

- Treatment of mucogingival problems
 - Free gingival graft for root coverage
 - Free gingival graft for the increase in the amount attached gingiva
 - Harvesting techniques (hands on)
- Surgical techniques for single and multiple recession defects
 - Coronally advanced flap for single and multiple recession defects (hands on)
 - Coronally advanced flap and connective tissue grafts (hands on)
- Soft tissue grafting in the mandibular anterior area
- Critical review of outcome parameters
- Decision making in root coverage procedures for aesthetic outcomes
- Aesthetic crown lengthening : treatment of gummy smile

About the Speaker

Sorin Boeriu completed the Periodontal Graduate Program at Case Western Reserve University (CWRU) School of Dental Medicine in Cleveland, Ohio and a PhD in medical sciences at the University of Medicine, Science and Technology of Targu Mures, Romania. Dr. Boeriu maintains a private practice limited to implant and periodontal surgery. He has published articles with emphasis on soft tissue grafting and periodontal/ restorative treatment of carious and non-carious cervical lesion. He is an international author & speaker. And he is a Fellow of the RCDCW, Diplomate of the International Congress of Implantologists, Member of the American Academy of Periodontology. Dr. Boeriu is the author of a two textbooks :

1. Periodontics in the Tradition of Bissada : Complete works as an educator, researcher and clinical practice
2. Clinical Periodontology and Implant Surgery : Translating fundamental questions into clinical practice

PERIODONTICS FOR THE GP

3 Day Course with Dr. Parvaneh Bahrami

June 7-9, 2024 Fall Dates: November 22-24, 2024

3 DAYS COURSE: **\$2,999** Plus HST

INDIVIDUAL COURSE DAY: **\$1,259** Plus HST

BREAKFAST, BREAK AND LUNCH INCLUDED

7 CE/DAY

AGD SUBJECT CODE: 490

LOCATION: SHAW LAB

105 Bentworth Ave Unit 1,
North York, ON M6A 1P6

NEW
One Day
Live Component
(with Patients)*
Fall Date TBD

*3 Day Periodontics for the GP Course is a pre-requisite

MODULE 1

Day 1: Periodontal Disease

- Etiology and diagnosis procedures
- The introduction of the new classification system
- Prognosis and Treatment Plan
- Non-surgical and surgical treatment option
- Periodontal maintenance program
- The principles of functional crown lengthening

Hands-On component* :

- Review Flap and Suturing Principles
- Osseous Resective Periodontal Surgery distal wedge

MODULE 2

Day 2: Soft Tissue Grafting

- Biologic principles and Etiology
- Diagnosis: Old and New Classification
- Indications, Goals and Objectives
- Case selection and treatment plan
- Soft tissue grafting procedures (FGG, CTG)

Hands-On component* :

- Free Gingival Grafting (FGG)
- Connective Tissue Grafting (CTG)

*You are required to bring loupes and additional instruments to the course, at your own cost.

MODULE 3

Day 3: Hard Tissue Grafting

- Biologic principles
- Goals and Objectives
- Indications and Treatment Plan
- Review different types of Bone grafts and membranes
- Complications

Hands on component* :

- Socket preservation
- Guided bone regeneration for treating periodontal bony defects

THE SPEAKER

Dr. Parvaneh Bahrami obtained her Master of Science in Periodontology and Implant Surgery in 2012 from the University of Toronto.

Dr. Bahrami is board-certified in Canada and USA and a Diplomat of the American Academy of Periodontology. She is a clinical instructor at the University of Toronto and practices as a periodontist and implant surgeon at Prosthodontics Associates.

Course Description:

Crown and bridge is the bread and butter of general practice and is routinely recommended for patients requiring indirect restorations. Advances in material science and CAD / CAM technologies have revolutionized and simplified the treatment procedures.

Forward thinking clinicians must negotiate this rapidly changing landscape and evaluate these new advancements that have the potential to improve and enhance the desired treatment in both interim and the final phase of treatment outcome. With such an increase in demand in procedures comes a desire to simplify the experience in regards to

- A) Patient management skills, treatment acceptance,
- B) Chair side fiber post and cores,
- C) Crown and bridge preparation, temporization, final impression, lab communication, occlusion, and final prosthesis.

* Please bring your loupes with you to the course

Virtual Didactic and Hands-On Objectives:

1. Post and core indications and usage
2. Learn efficient techniques in crown and bridge provisionalization.
3. Overview of tooth preparation. Do's and Don'ts
4. Pontic designs, soft tissue management, balance with pink and white esthetics.
5. Crown lengthening vs gingivectomy (indications and rationale). (Restorative challenges)
6. Digital and conventional impression techniques and tissue retraction.
7. Shade selection, Lab scripts, lab communication,
8. Ceramic selection
9. Cements and cementation techniques.

Hands-On:

1. Chair side post preparation in endodontic treated teeth and fiber post cementation.
2. Core build up.
3. Single crown and 3 unit FPD
 - a) Tooth preparation:
 - b) Impression (Digital and conventional) (3 Shape)
 - c) Soft tissue management.
 - d) Temporization.
 - e) Lab communication (lab scripts, material selection)

Material and hands-on suppliers and sponsors

STRUGGLING WITH BONE GRAFTING?

A Simplified 3 Step Approach to Predictable GBR

June 21st, 2024

9:00 AM - 5:00 PM

Location: Shaw Lab

(105 Bentworth Ave Unit 1,
North York, ON M6A 1P6)

Dr. Azeem Sheikh DDS

\$2,495 + HST

7 CE Credits

AGD Subject Code: 690

- Hate using membranes?
 - Site opening up prematurely?
 - What is the “dreaded” Periosteal Release?
 - Bone graft failing?
- **STEP 1:**
Platelet Rich Fibrin and sticky bone
- **STEP 2:**
Flap Management - Periosteal Release and Suturing
- **STEP 3:**
Implant Placement with simultaneous GBR

Participants will learn the concepts of Guided bone regeneration using a simplified 3 step approach in order to attain a predictable result.

A step by step protocol will be reviewed for treatment planning and execution which will cover flap design, grafting methods and materials, stabilization of the graft material and finally closure of the site to ensure treatment success. Case examples will be utilized to further demonstrate these concepts and fundamentals.

Applications For Surgery, Hair Growth And Esthetics

A Full Protocol Lecture And Workshop Course

October 25th, 2024

Location: **Toronto Congress Centre**

650 Dixon Rd, Etobicoke, ON M9W 1J1

9AM - 4PM ; 3 hours Lecture, 3 hours Hands-On.

Breakfast, Break and Lunch included

AGD Subject Code: 690

6 CE Credits

Benefits of using PRF in wound healing:

Platelet-rich fibrin is a second generation platelet concentrate which can enhance both soft and hard tissue healing. Its advantages over platelet-rich plasma include ease of preparation, ease of application, minimal expense, and lack of biochemical modification (no bovine thrombin or anticoagulant is required). This considerably reduces the biochemical handling of blood as well as risks associated with the use of bovine-derived thrombin. PRF also contains physiologically available thrombin that results in slow polymerization of fibrinogen into fibrin which results in a physiologic architecture that is favorable to wound healing.

- Better Healing.
- Predictable grafting.
- Subjectively less pain.

Course Objectives:

This lecture workshop will introduce the participant to the realm of PRF and how they can use it in practice to improve surgical outcomes, promote hair regeneration and provide facial esthetic solutions. The key is REGENERATION!

Course Outline:

- History of blood-based biologics and their use in dentistry.
- What is PRF?
- Lecture about Dr. Choukroun and PRF.
- Clinical Applications; Basic & Advanced.
- Lecture about phlebotomy techniques.
- Hands-on component to train the dentist and his/her staff- on collection of blood and manufacturing PRF.
- Live demonstration of venipuncture prior to practicing the learned skills on your colleagues.

Dr. Waji Khan

Dr. Khan grew up in Scarborough, Ontario. After graduating from high school he attended the University of Toronto, Trinity College and graduated with a Bachelor of Science with High Distinction in 1997. He then attended The University of Toronto Faculty of Dentistry and graduated with his Doctor of Dental Surgery in 2001. Dr. Khan served as a dental officer in the Canadian Forces from 1998-2007. Dr. Khan began practicing dentistry in Halifax, Nova Scotia with the Canadian Forces. In the CF he learned a lot through mentorship with dental specialists and advanced dental training courses. After a ten year career in the Canadian Forces, he then moved to Kingston with his wife and life partner Dr. Sohela Vaid in 2007 to pursue studies in Medicine and practice Dentistry.

THE ULTIMATE SINUS COURSE

CRESTAL and LATERAL Sinus Lifting:
DON'T be Intimidated anymore!

- Are you SCARED of the sinus?
- Worried about perforating the membrane?
- Not getting the results you want?

A pneumatized sinus can create a challenging situation for many dental implant practitioners. This presentation will focus on utilizing SAFE and INNOVATIVE techniques for PREDICTABLE indirect and direct sinus lifting. Careful evaluation and execution for both approaches will be reviewed in detail during this program, along with management of complications. Participants will then perform both techniques hands-on using sinus simulated models.

CRESTAL: CAS-kit

LATERAL: LAS-kit and Piezosurgery
