Course Description:

Crown and bridge is the bread and butter of general practice and is routinely recommended for patients requiring indirect restorations. Advances in material science and CAD / CAM technologies have revolutionized and simplified the treatment procedures.

Forward thinking clinicians must negotiate this rapidly changing landscape and evaluate these new advancements that have the potential to improve and enhance the desired treatment in both interim and the final phase of treatment outcome. With such an increase in demand in procedures comes a desire to simplify the experience in regards to

- Patient management skills, treatment acceptance,
- Chair side fiber post and cores,
- Crown and bridge preparation, temporization, final impression, lab communication, occlusion, and final prosthesis.

* Please bring your loupes with you to the course
