

# Modern Endodontics

## From Diagnosis To Restoration With Hands On Training

With **Dr. Rony E. Dagher**

B.Sc., DDS, M.Sc.(Cert. Endo), FRCDC(C)

Specialist in Endodontics and Traumatology

### Location:

Dentsply Sirona Academy &  
Showroom Canada

60 Courtneypark Dr. W Unit 1, Mississauga, ON L5W 0B3

### Date:

March 8<sup>th</sup>, 2024

### CE:

7 CE Hours

### AGD Subject Code:

070

### Fees:

\$749 + HST

### Sponsors:

## Concepts Covered

### Lectures: 8:30AM to 12:30PM

- Diagnosis
- Patient management
- Pain control
- Fundamentals of rotary instrumentation
- Latest in reciprocation techniques
- State of the art carrier-based obturation

### Hands-On: 1:30PM to 4:30PM

- Hands-on instrumentation and obturation

## Attendees Must Bring

- 2-3 Accessed Teeth
- Loupes

## Course Outline

This course will teach you which cases to treat predictably, and which cases to refer out for proper management. It introduces you to the fundamental concepts in rotary endodontics, regardless of the system you currently use. It will discuss diagnostic skills you should have to properly zero in on the patient chief complaint.

This course will reinforce the SOAP concepts in achieving proper diagnosis, and assess case difficulty and learn when to treat and to refer. Review local anesthesia techniques to help you achieve proper pain control. Cover and detail proper handling of endodontic procedure from isolation to access, canal location, instrumentation, disinfection and obturation details.

The course objectives will be for GPs to become confident in diagnosis, anesthesia, anatomy, instrumentation, irrigation and obturation.

The hands-on component will involve various Tulsa rotary systems and products.

Great emphasis will be given to diagnosis, case selection, proper anesthesia, glide path management and the efficient and safe use of reciprocation to create ideal shapes to allow proper and thorough disinfection of the canal space.

## About the Speaker

Dr. Rony Dagher is an Endodontist and a fellow with the Royal College of Dentists of Canada, who maintains a private practice in Mississauga Ontario Canada.

He is a graduate from the University of Toronto with a Bachelor of Science degree and obtained his DDS from Case Western Reserve University.

He attended the Toronto General Hospital surgical residency program and practiced general dentistry for 7 years prior to enrolling and completing a specialty Master's degree in Endodontics at the University of Toronto. Dr. Dagher has served as an instructor at both the undergraduate and graduate endodontic departments at the University of Toronto. He has served as an Endodontic examiner for the Royal college of Dentists of Canada.

Dr. Dagher holds a special interest in Dental Traumatology and regenerative Endodontics. He currently lectures on many Endodontic topics including rotaries, trauma, disinfection and regeneration. He is currently a member of numerous endodontic and dental associations and societies.
