Tala Batarseh, Dental Practice Consultant

Tala is the founder, owner and operator of DenTala. Graduate of York University with a Bachelor of Business Administration and a Certificate of Management, Tala has over 15 years of experience in the dental industry. She has achieved a Certificate of Dental Practice Management from the University of Toronto, accompanied with multiple CE courses in Sales, Treatment Coordination, Executive and Leadership Training. Additionally, she has successfully completed trainings at the University of Toronto for the new IPAC standards. Tala has integrated her theoretical expertise, and industry experience toward helping many dental practices achieve success in their business. Passionate and driven, Tala continues to partner up with dentists opening new practices, or desiring more success out of their existing businesses to help them achieve levels of success beyond their expectation.

Botox in Dentistry Program *with* Dr. Sky Naslenas

Dr. Sky Naslenas is a practicing orthodontist, educator, and innovator dedicated to advancing the science and art of facial pain management.

By the end of this course, participants will be equipped with the knowledge and skills necessary to confidently integrate Botox treatments into their dental practice, enhancing patient care and expanding their scope of services.

\$2,495 + HST
(Includes Breakfast, Break, and Lunch)

COURSE OUTLINE

This course introduces dentists to the essential principles and clinical use of Botox in dentistry. Participants will learn key orofacial anatomy, proper patient assessment, safe injection techniques, and practical skills through interactive sessions and hands-on training with live patients.

By taking this course, you can earn certification to administer Therapeutic Botox in Ontario.

COURSE OBJECTIVES

1. Understand the pharmacology and mechanism of Botox.
2. Identify and describe the anatomical structures of the face pertinent to Botox administration.
3. Demonstrate proficiency in patient assessment and selection criteria for Botox treatment.
4. Master the techniques for administering Botox injections safely and effectively in the orofacial area.
5. Learn how to manage and minimize complications associated with Botox injections.
6. Discuss ethical and legal considerations relevant to the use of Botox in dental practice.
7. Explore the potential applications of Botox beyond cosmetic enhancements, including therapeutic uses in dentistry.

**DURBAN DENTAL
LABORATORY**

595A TRETHEWEY DRIVE
NORTH YORK, ON M6M 4B8

COURSE OBJECTIVES

TMJ dysfunction is only a small part of the problem dentists deal with daily. There are so many other occlusal discrepancies that impact on our dentition. Never-the-less, dental care may lead to TM joint dysfunction if occlusal discrepancies result from restorative treatment. In this lecture we will examine how restorative dentists correct malocclusion in the dentate, edentulous and implant supported dentitions. Hands-on sessions will supplement didactic presentations.

TOPICS COVERED

- Vertical Dimension of Occlusion
- Occlusal loading on both dentate and implant prostheses
- Collapsed posterior tooth support, the "roller coaster plane of occlusion"
- Myofascial Pain Dysfunction
- TM joint Dysfunction

Young dentists and seasoned veterans will benefit from this presentation.

Dr. Morley S. Rubinoff
Prosthodontist

Dr. Rubinoff is a graduate of the Faculty of Dentistry, University of Toronto (1974). Dr. Rubinoff completed a post-doctoral program in Prosthodontics from the State University of New York at Buffalo in 1984. Dr. Rubinoff has served as the President of the Association of Prosthodontists of Ontario, The Association of the Prosthodontists of Canada and is the founding President of the Canadian Dental Protective Association. He has been awarded the Certificate of Merit by the Canadian Dental Association and received a fellowship from the Academy of Dentistry International. Dr. Rubinoff was an instructor/mentor at the Faculty of Dentistry, University of Toronto in the Graduate Department of Prosthodontics. Dr. Rubinoff is a Senior Fellow of the International Team for Implantology (ITI).

Enhance Your Crown & Bridge Skills

Fundamental Principles Of Fixed Tooth-Supported Restorations

Sponsored By

i-VISTA MED

Dr. Bobby Baig
B.D.S A.E.G.D., Cert. Prosth.,
F.R.C.D.(C)

Dr. Bobby Baig is Clinical Director of Prosthodontics at the University of Rochester's Eastman Institute for Oral Health and Associate Professor in General Dentistry. A board-certified Prosthodontist in Canada, he maintains a private practice at Dental Specialists Group.

Leonid Gurgov, CDT

Leonid Gurgov earned his Advanced Diploma from George Brown College and became one of the youngest Registered Dental Technologists in Ontario. A Fellow of the International Academy for Dental Facial Esthetics, he specializes in CAD/CAM technology and aesthetic implant-supported restorations.

Dr. Mario Rotella
Cert. Prosth., F.R.C.D.(C)

Dr. Mario Rotella Cert. Prosth., F.R.C.D.(C), focuses his practice concentrating on the treatment of complex cases of aesthetic and functional rehabilitation on natural dentition and implants, with emphasis on veneers, crowns, bridges and dentures.

Day 1: May 21, 2026

\$299+HST

WEBINAR | 6PM - 9PM | 3CE (CORE 1) | AGD SUBJECT CODE: 610

EXPECTATIONS & GOALS

1. Biological Principles

- Preservation of Tooth Structure: maintain tooth structure for strength and vitality
- Periodontal Health: Precision of fit and long-term maintenance. Optimal Periodontal Health
- Aesthetic Considerations: Restorations in harmony with natural occlusion
- Margin Adaptation and Material Selection: Seamless marginal adaptation

2. Mechanical Principles

- Retention and Resistance form (RR form): Restoration designs to meet the RR form.

3. Esthetic Principles

- Aesthetic Integration: Seamless integration with surrounding natural teeth in terms of color, shape, and contour.
- Proportions and Alignment: Attention to detail for restorations harmony and alignment with white and pink.

4. Functional and technical (Lab) Principles

- Occlusal Harmony & Efficiency: Effective functional guidance for predictable mutually protected occlusion.
- Accuracy in Preparation and Ceramic selection: Attention to detail in tooth preparation, impression for post and cores, crowns and bridges, clinical protocols for posts and crowns.
- Proper Fabrication: New trends in digital planning and effective lab communication.

5. Patient-Centered / Treatment Planning Principles

- Informed Consent/Communication: Effective patient communication. Post Treatment care.

COURSE OBJECTIVES

1. For successful and predictable fixed tooth-supported restorations for durable, functional, and aesthetically pleasing results.
2. In depth review of biological, mechanical, occlusal and esthetic principles.
3. Critical Analysis of Do's and Don'ts for post and core, crowns and bridges.

Module 1

Day 1: Periodontal Disease

- Etiology and diagnosis procedures
- The introduction of the new classification system
- Prognosis and Treatment Plan
- Non-surgical and surgical treatment option
- Periodontal maintenance program
- The principles of functional crown lengthening

Hands-On component* :

- Review Flap and Suturing Principles
- Osseous Resective Periodontal Surgery distal wedge

Module 2

Day 2: Soft Tissue Grafting

- Biologic principles and Etiology
- Diagnosis: Old and New Classification
- Indications, Goals and Objectives
- Case selection and treatment plan
- Soft tissue grafting procedures (FGG, CTG)

Hands-On component* :

- Free Gingival Grafting (FGG)
- Connective Tissue Grafting (CTG)

* You are required to bring loupes and additional instruments to the course, at your own cost.

Module 3

Day 3: Hard Tissue Grafting

- Biologic principles
- Goals and Objectives
- Indications and Treatment Plan
- Review different types of Bone grafts and membranes
- Complications

Hands on component* :

- Socket preservation
- Guided bone regeneration for treating periodontal bony defects
