PROGRAM AT-A-GLANCE

CLINICAL 1 IMPLANT POWER HOUSE

Dr. Mark Bishara
9:00am - 10:00am

Full Arch Therapy: To Fp1 or to Fp3 Clinical Failures & How to Avoid Them

10:00am - 10:30am | Exhibit Hall Break

Dr. Lesley David, DDS, Dip. OMFS
10:30am - 11:30am

Digital Implant World Simplified for The GP

Dr. Omid Moghaddas, DDS, MSC Board Certified Periodontist in Iran
11:30am - 12:30pm

Road to Success in Esthetic Implantology

12:30pm - 1:30pm | Exhibit Hall Lunch Break

Dr. Rick Ferguson, DMD, ABOI, DICOI
1:30pm - 2:30pm

3D Printing in the Dental practice– Current Applications

Dr. Moemen Metwally, DDS, FAGD, AFAAD
2:30pm - 3:30pm

Mastering the Atrophic Maxilla: Predictable Solutions for The Unsalvageable

3:30pm - 4:00pm | Exhibit Hall Break

Dr. Mark Nicolucci, DDS, MS, FRCD(C)
4:00pm - 5:30pm

Implants in 2025: An Update for Dentists

5:30pm - 7:00pm | Cocktail Reception

CLINICAL 2

Dr. Larry Gaum, DDS, FADSA, FICD, FADI
9:00am - 10:00am

Complications In Oral Surgery Are Real Things That Can Happen To Anyone

10:00am - 10:30am | Exhibit Hall Break

(From left to right) Dr. Izchak Barzilay, DDS, Cert. Prosth., MS, FRCDC

Dr. Effrat Habsha, BSc, DDS, Dip Prosth., MSc, FRCDC

Dr. Elahe Behrooz, DDS, MBA, DDS, MSc (Prosth.), FRCDC

Dr. Mahmood Abu Ruja, DDS, PhD, MSc (Prosth.), FRCDC

Dr. Parvaneh Bahrami, DDS, MSc (Perio), FRCDC, ABP Dip, Board Certified in Canada and US

Dr. Majid Zakeri, DDS, MSc (Prosth.), FRCDC

Mariela Gonzalez, Chief Financial Officer, Build Your Smile Foundation

10:30am - 12:30pm

Complications in Dentistry – How to Avoid And Deal with Them

12:30pm - 1:30pm | Exhibit Hall Lunch Break

Tara Doster, MBA
1:30pm - 2:30pm

Bonding and Cementation Demystified

Amelia Edmonds, DC & Yolande Truong, DC
2:30pm - 3:30pm

Temporomandibular Disorders: Evidence-Based Approaches and Strategies for Patient-Centered Management

3:30pm - 4:00pm | Exhibit Hall Break

Dr. Mark Safari, DDS
4:00pm - 5:30pm

Optimizing Dental Implant Success through Platelet Concentrates and Biologics

5:30pm - 7:00pm | Cocktail Reception

PROGRAM AT-A-GLANCE

CLINICAL 3

Dr. Shammick Kotecha, *DDS*
9:30^{am} - 10:30^{am}
Digital VS Analog: Where Are We Today?

10:30^{am} - 11:00^{am} | Exhibit Hall Break

Dr. Soheil Khojasteh, *BHSc, DDS, MSc, Diplomate ADBA*
11:00^{am} - 12:00^{pm}
Analgesia and Pain Control in Dentistry

12:00^{pm} - 1:00^{pm} | Exhibit Hall Lunch Break

Dr. Claude Martel
1:00^{pm} - 2:00^{pm}
Introducing e.max Prime Zirconia in The Day to Day CEREC Practice

Dr. Tarek Sharkas, *DDS, MDS, Cert Prostho, FRCD(C)*
2:00^{pm} - 3:00^{pm}
"The Tale of Two Implants" Why One Failed and One Succeeded

3:00^{pm} - 3:30^{pm} | Exhibit Hall Break

Jennifer Turner, *RDH*
3:30^{pm} - 4:30^{pm}
Data Driven Hygiene

5:30^{pm} - 7:00^{pm} | Cocktail Reception

DIGITAL WORKFLOW

Dr. Azeem Sheikh, *DDS*
9:00^{am} - 10:00^{am}
Immediate Molar Implants - Digital Workflow from Start to Finish

10:00^{am} - 10:30^{am} | Exhibit Hall Break

Dr. Joseph Fava, *Prosthodontist &*
Karim Sahil, *RDT, MDT*
10:30^{am} - 12:30^{pm}
Simplifying Digital Workflows From Single Tooth Implant to Full Mouth Reconstruction.

12:30^{pm} - 1:30^{pm} | Exhibit Hall Lunch Break

Dr. Waji Khan, *CD, BSc, DDS, MBA, MEd*
1:30^{pm} - 2:30^{pm}
CBCT Use For The General Practitioner In Dentistry; How This Technology Can Improve Your Clinical Game!

Mark Chan, *DD &*
Dr. Jason Adinata, *HBSc DDS AEGD, MSc*
2:30^{pm} - 3:30^{pm}
Using Digital Dentistry to Solve Everyday Aesthetic Challenges in General Dentistry

3:30^{pm} - 4:00^{pm} | Exhibit Hall Break

Dr. Morley S. Rubinoff, *Prosthodontist*
4:00^{pm} - 5:00^{pm}
Predictable Results with Occlusal Or TMJ Dysfunction

5:30^{pm} - 7:00^{pm} | Cocktail Reception

PROGRAM AT-A-GLANCE

TECHNICAL 1

(From left to right) Karim Sahil, *RDT, MDT*

Christopher Ji, *RDT*

Mrs. Judith Rigby

9:00am - 10:00am

Peer Circles And Professional Excellence—
The RDT Is The Subject Matter Expert And Voice Of The Profession

Dora Rodrigues, *DT*

10:00am - 11:00am

Fast And Flawless : Mastering The Full Arch Digital Workflow

11:00am - 11:30am | Exhibit Hall Break

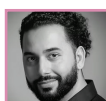

Jennifer Dibben, *RDT*

11:30am - 12:30pm

"Just Build a Digital Workflow," They Said. "It'll Be Great," They Said...And it Can Be— If You Know the Whole Story

12:30pm - 1:30pm | Exhibit Hall Lunch Break

Karim Sahil, *RDT, MDT*

1:30pm - 2:30pm

Dental Technologist - Dentist Simplifying Modern Day Ceramics Using Technology.

Alex Chabachevitch, *RDT*

2:30pm - 3:30pm

Finding New Solutions To Our Everyday Challenges In The Everchanging Dental World

3:30pm - 4:00pm | Exhibit Hall Break

Mark Chan, *DD*

4:00pm - 5:00pm

Vita Vionic DentDisk: Uses and Applications in The Modern Day Lab

5:30pm - 7:00pm | Cocktail Reception

TECHNICAL 2

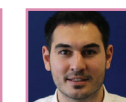

Kaveh Shams, *DT*

9:30am - 10:30am

Minimal Thickness, Maximum Aesthetics, Exploring Prettau® Skin® Veneers in Clinical and Lab Practice

10:30am - 11:00am | Exhibit Hall Break

(From left to right) Eyal Geiger, *CEO of 3D Prime Tech*

Mr. Fatih Arikcan

Helen Tran, *RDT*

11:00am - 12:00pm

A New Streamlined Workflow For Partial & Denture Digital Design & 3D Printing Production Powered By Exocad, Imes-icore & TRUMPF

12:00pm - 1:00pm | Exhibit Hall Lunch Break

Michael Suris, *CDT*

1:00pm - 2:00pm

Advancing Digital Denture Workflows: Techniques for Precision and Efficiency

Kevin Stuart, *Product Manager, Quatro Air Technologies*

2:00pm - 3:00pm

"Better Air Quality Makes Dollars And Sense" What You REALLY Need To Know

3:00pm - 3:30pm | Exhibit Hall Break

Andre Gaul, *CDT*

3:30pm - 4:30pm

3D Printing in The Lab: Improving Results

Dr. Bobby Baig, *BDS., AEGD., Cert Prosthodontist., F.R.C.D.(C).*
& Leonid Gurgov, *CDT*

4:30pm - 5:30pm

Lab Communication And Prosthetic Errors And Their Consequences In Implant Dentistry

5:30pm - 7:00pm | Cocktail Reception

PROGRAM AT-A-GLANCE

DENTURIST 1

Alex Zlatin, *CEO Mint Ops & Savannah Koran, Director of Operations Mint Ops*

9:00am - 10:00am

Staffing and HR Management for a Thriving Dental Team

10:00am - 10:30am | Exhibit Hall Break

Tanya Little, *DD*
10:30am - 11:30pm

Thoughts from A Denturist, Creating Dentures for 20 Years!

Milan Jovanovic, *RD* & Francesca Girardo, *RD*, *DD*
11:30am - 12:30pm

Implant-Supported Dentures from Start to Finish:
A Denturist's Perspective

12:30pm - 1:30pm | Exhibit Hall Lunch Break

Philip Segal
Director of Digital Development & Special Projects, Keystone Dental
1:30pm - 2:30pm

Denture Conversion Simplified: The EasyPro Protocol for Predictable Outcomes Practice

2:30pm - 3:00pm | Exhibit Hall Break

Dean Fenwick, *Founder, Specialized Office Systems Inc.*
3:00pm - 4:00pm

Artificial Intelligence - Powered Practice Management with DOMx

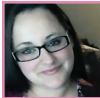

Alex Chabachevitch, *RD* & Andreas Klie, *RD*
4:00pm - 5:00pm

Integrating Photogrammetry in Intraoral Procedures

5:30pm - 7:00pm | Cocktail Reception

DAO - PYP PROGRAM

Mallory Potter, *Executive Director at DAC*
9:30am - 10:30am

The Non-Insured Health Benefits (NIHB) Program, Dental Benefit- An Overview

10:30am - 11:00am | Exhibit Hall Break

Pam Rehm, *RD*
11:00am - 12:30pm

Optimizing Digital Denture Design for Milling: Material Insights and Workflow Efficiency

12:30pm - 2:00pm | Exhibit Hall Lunch Break

(From left to right) Zahra Vaid, *Lawyer*
Olivia Hynes, *Claims Director, Berkley Canada & Lindsay Kary, Director, BMS Canada*

2:00pm - 3:00pm

Dealing With A Clinical Complaint Or Audit? Now What? Best Practices For Documentation And Protection

3:00pm - 3:30pm | Exhibit Hall Break

Youhanna Salib, *Director of Consulting Services at IPAC Consulting*
3:30pm - 4:30pm

Protect Your Practice: A Denturist's Guide to Acing IPAC Audits

Tyler Di Cristofaro, *Health and Safety Specialist*
4:30pm - 5:30pm

Know Your Role: Health & Safety Legal Duties for Denture Clinic Owners

5:30pm - 7:00pm | Cocktail Reception

PROGRAM AT-A-GLANCE

DENTAL HYGIENE CENTRAL

Dr. Michael Glogauer

9:00^{am} - 9:50^{am}

From Gums to Heart: Optimizing Periodontal and Peri-Implant Health Through Monitoring, Microbiome Balance, and Non-Invasive Therapies

Kerry Lepicek, RDH

9:50^{am} - 10:50^{am}

Unlocking the Bright Smile: A Comprehensive Guide to Teeth Whitening in Dental Practices

10:50^{am} - 11:20^{am} | Exhibit Hall Break

Dr. Luciana Arcaro

11:20^{am} - 12:10^{pm}

Achieving & Sustaining IPAC Compliance: Best Practices

12:10^{pm} - 1:10^{pm} | Exhibit Hall Lunch Break

Anna Louise Tolan, RDH, FADIA

1:10^{pm} - 2:00^{pm}

Client-Centred Periodontal Disease Treatment

Michelle Aube-Simmonds, RDH

2:00^{pm} - 3:00^{pm}

Sterilization Leadership: Leading with Protocol, Not Panic

3:00^{pm} - 3:30^{pm} | Exhibit Hall Break

Dr. Mark Bishara

9:00am - 10:00am

Full Arch Therapy: To Fp1 or to Fp3 Clinical Failures & How to Avoid Them

Learning Objectives:

- This presentation aims to outline a decision tree algorithm for planning your cases
- Learn about emerging trends in Partial Extraction Therapy and application in full arch
- Learn about digital smile applications in case planning to avoid complications

Dr. Mark Bishara

Dr. Mark Bishara completed his undergraduate studies in medical biophysics, at the University of Western Ontario and was a gold medal recipient as top graduate of his program. He went on to complete his Doctor of Dental Surgery degree at the Schulich School of Medicine and Dentistry. Since graduating, he practices in the Durham region with a focus on digital workflow, dental implants, bone grafting material regeneration and tissue regeneration. He currently collaborates with members of the Miron Lab in the United States on tissue regeneration utilizing Platelet Rich Fibrin (PRF). He is a published author on PRF, immediate dental implants and clinical applications. Most recently, he authored a chapter on Partial Extraction Therapy (PET): Single tooth to full arch applications in the best selling "Modern Implant Dentistry" Textbook released by Quintessence Publishing. He is the President and founder of the Canadian Implant Dentistry Network (CIDN), Canada's largest dental implant community. He can be reached at info@cdnimplants.com

10:00am - 10:30am | Exhibit Hall Break

Dr. Lesley David, DDS, Dip. OMFS

10:30am - 11:30am

Digital Implant World Simplified for the GP

Learning Objectives:

- To review the pros and cons of digital implant technology
- To understand how digital technology can enhance implant work flows from single tooth to full arch
- To appreciate the various ways technology can be implemented into your specific practice

Dr. Lesley David

Dr. Lesley David is an oral and maxillofacial surgeon who maintains a private practice in Toronto. She is an Associate Clinician at the University of Toronto in the Oral and Maxillofacial Surgery Clinic, a Fellow and past examiner of the Royal College of Dentists of Canada and is on staff at the Mt. Sinai Hospital and The Trillium Hospital. Dr. David is a remedial course provider for the Royal College of Dentists of Ontario in oral and maxillofacial surgery and implant dentistry. She is also on several industry related advisory boards and a key opinion leader for various dental related companies. Dr. David is a co-founder of Global Dental Mentorship. She has numerous publications in implant dentistry. Dr. David lectures internationally on various topics in implant dentistry and oral and maxillofacial surgery.

Dr. Omid Moghaddas, DDS, MSC,
Board Certified Periodontist in Iran

bredent
group

11:30am - 12:30pm

Road to Success in Esthetic Implantology

Description:

In this presentation, we will discuss:

- Rationals for immediate implantation
- Principles and indications for socket preservation
- Classification of extraction sockets 3 dimensional implant positioning
- Gap management around implants
- Dual zone socket management
- Principles in achieving predictable primary stability
- Phenotype modification in thin periodontium
- Choosing proper size of healing abutments
- Importance of provisional restorations

Dr. Omid Moghaddas

Dr. Omid Moghaddas is a Board Certified Periodontist and Clinical Assistant Professor in Iran. He completed a Fellowship in Implantology at the State University of New York and currently serves as the Scientific Director of the Iranian Academy of Periodontology. He is the President and Founder of the International Symposium of Complications in Implant Dentistry and an Editorial Board Member of the International Journal of Esthetic Dentistry.

Dr. Moghaddas is also recognized as a DentalXP Expert, Ambassador of Digital Dentistry Society Master of ICOI Ambassador of Clean Implant Foundation. He is the author of 12 books in Periodontics and Implant Dentistry and has delivered over 250 presentations and 100 live surgeries around the world.

12:30^{pm} - 1:30^{pm} | Exhibit Hall Lunch Break

Dr. Rick Ferguson, DMD, ABOI,
DICOI

Pac-Dent[®]
Passion for Excellence

1:30pm - 2:30pm

3D Printing in the Dental practice – Current Applications

Description:

In this presentation, we will discuss:

- Rationals for immediate implantation
- Principles and indications for socket preservation
- Classification of extraction sockets 3 dimensional implant positioning
- Gap management around implants
- Dual zone socket management
- Principles in achieving predictable primary stability
- Phenotype modification in thin periodontium
- Choosing proper size of healing abutments
- Importance of provisional restorations

Dr. Rick Ferguson

Dr. Rick Ferguson has been involved in teaching implant dentistry for the last 32 years and has lectured in every major city in the United States and internationally in many countries. He has placed and restored over 10,000 dental implants and maintains a private practice with his wife Dr. Katherine Ferguson in Davie, FL emphasizing dental implants as well as a home in Vancouver BC. They also teach a live surgery course and have been attended by thousands of dentists. More recently he has been a pioneer in developing 3D printing techniques for dentistry.

Dr. Moemen Metwally, DDS,
FAGD, AFAAID

2:30pm - 3:30pm

Mastering the Atrophic Maxilla: Predictable Solutions for the Unsalvageable

Description:

By the end of this session, participants will be able to:

- Differentiate between grafting and graftless approaches for treating the severely resorbed maxilla and identify indications for each.
- Evaluate diagnostic tools such as CBCT, intraoral scanning, and photogrammetry for treatment planning in atrophic cases.
- Understand surgical options including sinus lifts, short implants, pterygoid, and zygomatic implants, and how they integrate into a prosthetic-driven workflow.
- Apply prosthetic principles in full-arch rehabilitation to optimize esthetics, function, and long-term maintenance in challenging maxillary cases.
- Develop treatment strategies for patients previously deemed non-candidates, improving case acceptance and patient outcomes.

Dr. Moemen Metwally

Dr. Moemen Metwally brings a unique perspective to oral surgery and implantology. Dr. Metwally has been in private practice since 2012 and has built a career revolving around oral surgery and implantology. His daily practice is limited to implant dentistry from single implants to full mouth rehabilitation utilizing all on x treatment. Including same day loading protocols, including the use of zygomatic and pterygoid implants. He routinely takes on difficult failures that require thinking outside the box for solutions. He has placed thousands of implants over the last decade and understands the challenges that come with difficult or failing cases. His understanding of both restorative and surgery allows for a comprehensive approach. His ability to work with others as a team to treat large and complex treatments has allowed him to continue to grow his network of referrals. Dr. Metwally loves mentorship and looks forward to being a part of another colleague's implant journey.

3:30pm - 4:00pm | Exhibit Hall Break

Dr. Mark Nicolucci, DDS, MS,
FRCD(C)

4:00pm - 5:00pm

Implants in 2025: An Update for Dentists

Description:

Even if you don't place or restore implants, understanding how implant dentistry has evolved is essential. This lecture reviews what's changed - and what hasn't - in a practical, evidence-based format, with a focus on patient-centered outcomes.

Dr. Mark Nicolucci

Dr. Mark Nicolucci earned his Doctor of Dental Surgery from the University of Western Ontario in 2006 and went on to complete a General Practice Residency at Temple University in Philadelphia. In 2010, he graduated from Temple's specialty program in Periodontology and Oral Implantology, earning both a Certificate in Periodontology and Oral Implantology and a Master's degree in Oral Biology. Dr. Nicolucci is a Diplomate of the International Congress of Oral Implantologists and holds a Mastership from the Misch International Implant Institute. He has been actively involved in continuing education for over a decade, lecturing and attending conferences both locally and internationally. He frequently presents to general dentists on topics related to implant dentistry and periodontics. Dr. Nicolucci has practiced across several clinics in Southwestern Ontario and, for the past seven years, has operated a full-time specialty practice in West Toronto. His practice philosophy centers on delivering high-quality care with a strong emphasis on communication and service to referring dentists. Coming from a family of dentists, Dr. Nicolucci carries forward a legacy of clinical excellence and a commitment to professional development and patient-centered care.

Dr. Larry Gaum, DDS, FADSA,
FICD, FADI

9:00am - 10:00am

Complications In Oral Surgery Are Real Things That Can Happen To Anyone

Description:

Everyone is an expert until disaster strikes! Then the experts disappear!

This is a review of many of the most common complications in oral surgery

- Learn how to SOLVE them when they happen in your office.
- Learn how to AVOID them before they start.

Dr. Larry Gaum

Dr. Lawrence (Larry) Gaum is an oral surgeon who maintains a private practice in Toronto, Ontario, Canada. He is a graduate of Dalhousie University Dental School in Nova Scotia, Canada. He practiced general dentistry for five years before taking his post-graduate training in Anaesthesia and Oral Surgery at the University of Pittsburgh and the Wilmington Medical Centre in Delaware. He is a former Associate Professor in Dentistry, University of Toronto, where he taught for over twenty years. He has lectured extensively throughout Canada, USA and numerous other countries, teaching his fellow dentists oral surgery, anaesthesia and pharmacology.

10:00am - 10:30am | Exhibit Hall Break

Dr. Izchak Barzilay, DDS, Cert.
Prosthodontics, MS, FRCDC

Dr. Efrat Habsha, BSc, DDS, Dip
Prosthodontics, MSc, FRCDC

10:30am - 12:30pm

Complications In Dentistry – How To Avoid And Deal With Them

Description:

Even a well run practice (Prosthodontic Associates) has its share of complications. Those complications relate to administrative difficulties, clinical practice and laboratory issues. This presentation will present in a Panel Discussion format how these complications are managed and how liability is reduced in many of these situations. The presenters all work in the same multidisciplinary environment and are often called on to back up each other when difficulties arise.

Learning Objectives:

1. Learn to identify when a complication is about to cause difficulties and how to deal with it
2. How to hire the best staff to support today's dental environment
3. Bullet proof office protocols and policy

Dr. Izchak Barzilay

Dr. Izchak Barzilay received his DDS from the University of Toronto in 1983, a Certificate in Prosthodontics from the Eastman Dental Center in 1986, and an MS from the University of Rochester in 1991. He is Head of Prosthodontics and Restorative Dentistry at Mt. Sinai Hospital,

Dr. Elahe Behrooz, DDS, MBA,
DDS, MSc (Prosth), FRCDC

Dr. Mahmood Abu Ruja, DDS,
PhD, MSc (Prosth), FRCDC

Dr. Parvaneh Bahrami, DDS,
MSc (Perio), FRCDC, ABP Dip, Board
Certified in Canada and US

Dr. Majid Zakeri, DDS, MSc
(Prosth), FRCDC

Mariela Gonzalez, Chief Financial
Officer, Build Your Smile Foundation

Complications In Dentistry (cont'd)

Chief Examiner in Prosthodontics for the Royal College of Dentists of Canada, and teaches at the University of Rochester, George Brown College, and the University of Toronto. A past president of national prosthodontic organizations, he serves on international advisory boards and is widely published with multiple fellowships and awards recognizing his research and teaching.

Dr. Effie Habsha

Dr. Effie Habsha earned her DDS, Diploma in Prosthodontics, and MSc from the University of Toronto, following a residency at Mount Sinai Hospital. A Fellow of the Royal College of Dentists of Canada, she also holds fellowships with the Pierre Fauchard Academy, the Academy of Prosthodontics, and the Greater New York Academy of Prosthodontics. Dr. Habsha teaches at the University of Toronto, University of Rochester, George Brown College, and Mount Sinai Hospital, while maintaining a private prosthodontics and implant dentistry practice in Toronto and lecturing internationally.

Dr. Elahe Behrooz

Dr. Elahe Behrooz earned her first DDS in Iran, an MBA from Carleton University, and a second DDS with honors and a Prosthodontics specialization from the University of Toronto. She is a clinical instructor in Graduate Prosthodontics at U of T, Chief of Clinical Operations for the Build Your Smile Dental Foundation, and a clinical associate at Mount Sinai Hospital. Dr. Behrooz also maintains a Toronto practice limited to prosthodontics and implant dentistry.

Dr. Mahmood Abu Ruja

Dr. Mahmood Abu Ruja received his dental degree from the University of Jordan, followed by an MSc in Prosthodontics and a PhD in Dental Materials at the University of Toronto. His award-winning research focuses on Zirconia bonding, surface treatment, and implant complications. He is an instructor in Prosthodontics at U of T and maintains a private prosthodontic practice.

Dr. Parvaneh Bahrami

Dr. Parvaneh Bahrami obtained her Master of Science in Periodontology and Implant Surgery in 2012 from the University of Toronto. Dr. Bahrami is board-certified in Canada and USA and a Diplomate of the American Academy of Periodontology. She is a clinical instructor at the University of Toronto and practices as a periodontist and implant surgeon at Prosthodontics Associates.

Dr. Majid Zakeri

Dr. Majid Zakeri, a graduate of the University of Toronto, is a Prosthodontist and Assistant Professor at U of T, where he teaches, conducts research, and contributes to implant training programs. He also teaches at Mount Sinai Hospital and has participated in international outreach initiatives. His private practice in the GTA focuses on complex restorative and implant-supported treatments.

Mariela Gonzalez

Mariela Gonzalez began her dental career in 1989 with Dentsply International and joined Prosthodontic Associates in 1999, where she now serves as Business and Human Resources Manager. She oversees operations and HR development while mentoring staff and pursuing her CHRP designation. Mariela also acts as CFO of the Build Your Smile Dental Foundation, supporting underprivileged communities in Canada and abroad.

Tara Doster, MBA

ivoclar

1:30pm - 2:30pm

Bonding and Cementation Demystified

Description:

This program will provide dentists with the essential knowledge and practical skills for successfully bonding zirconia restorations to dentin and enamel. Participants will learn how to determine whether bonding or cementation is the most appropriate method for securing the restoration, considering factors such as material compatibility and clinical requirements.

Tara Doster

Tara completed her MBA at Medaille College, Buffalo, NY. She began her career at Ivoclar in 2009 as a Marketing Manager managing permanent cements, temporary cements and impression materials.

Tara is the Global Product Manager for Cementation. She is responsible for creating and managing cement products internationally.

Amelia Edmonds, DC

Yolande Truong, DC

2:30pm - 3:30pm

Temporomandibular Disorders: Evidence-Based Approaches and Strategies for Patient-Centered Management

Description:

This lecture offers an evidence-based update on the conservative management of musculoskeletal orofacial pain, with a focus on temporomandibular disorders (TMD). It highlights recent research supporting patient-centered approaches such as self-management, exercise therapy, and psychosocial strategies. The lecture also introduces the Diagnostic Criteria for Temporomandibular Disorders (DC/TMD) as a standardized tool to guide assessment and promote consistent communication among healthcare providers. Clear, shared language can enhance interdisciplinary collaboration and improve patient outcomes. Attendees will leave with practical knowledge and tools to support effective, evidence-informed management of TMD in clinical practice.

Dr. Amelia Edmonds

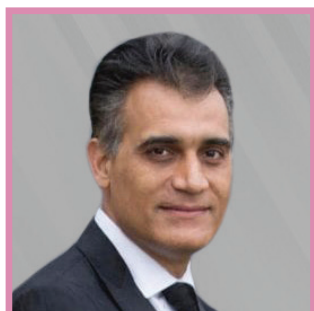

Dr. Amelia Edmonds is a chiropractor practicing in Toronto at the Jaw and Facial Pain Centre. She is a graduate of the Canadian Memorial Chiropractic College and McMaster University with honours in kinesiology. Dr. Edmonds is passionate about finding solutions for people with orofacial pain and believes that an accurate diagnosis and a tailored treatment plan are fundamental in providing high-quality care. She is an advocate for interdisciplinary collaboration to provide patients with well-rounded care, leading to better patient outcomes. Dr. Edmonds enjoys teaching other healthcare professionals how to improve the management of orofacial pain in their practice, with the goal of increasing awareness of musculoskeletal orofacial pain, reducing mismanagement, and ultimately helping patients access timely, effective care.

Dr. Yolande Truong

Dr. Yolande Truong is a chiropractor practicing in Toronto at the Jaw and Facial Pain Centre. She has a special interest in the conservative management of temporomandibular disorders (TMD) and musculoskeletal orofacial pain. She is passionate about evidence-informed, patient-centered care that prioritizes function, communication, and long-term outcomes. Dr. Truong is a graduate of the Canadian Memorial Chiropractic College and the Richard Ivey School of Business at Western University. She combines her clinical expertise with a strong commitment to interdisciplinary collaboration and education, empowering patients and practitioners alike with tools to improve care.

3:30pm - 4:00pm | Exhibit Hall Break

Dr. Mark Safari, DDS

4:00pm - 5:30pm

Optimizing Dental Implant Success Through Platelet Concentrates And Biologics

Description:

The regenerative power of platelets and their biological derivatives has captured widespread attention in scientific research and in clinical applications for their promising potential in advancing regenerative therapies. Platelets play a vital and dynamic role in wound healing, contributing to hemostasis, cell growth, angiogenesis, differentiation, and the regulation of inflammation.

This lecture aims to provide a comprehensive understanding by integrating the latest evidence on the regenerative power of platelet derivatives, with a particular emphasis on their application in implant dentistry.

Dr. Mark Safari

Dr. Mark Safari, DDS, graduated in 1994 in Iran, received his Canadian dental license in 1999, and has since built over 25 years of experience practicing in Toronto. He owns and operates two established practices in North York and Richmond Hill, with expertise in advanced prosthetic and implant dentistry, including over 2,500 implant placements and full-arch All-on-4 procedures. Dr. Safari is highly skilled in bone grafting, sinus lifts, augmentation, guided surgery, digital planning with CEREC CAD/CAM, and regenerative techniques, having trained under Dr. Eduardo Anitua in Spain in 2014. In addition to training in sleep apnea therapy and orthodontics, he is the founder and a board member of Grand Genesis Health, a leading private medical and surgical center in the GTA.

Dr. Shammick Kotecha, DDS

9:30am - 10:30am

Digital Vs Analog: Where Are We Today?

Description:

The rapid expansion of digital technologies presents both opportunities and challenges for general practitioners. While analog protocols remain foundational to dental practice, digital workflows offer new levels of efficiency, precision, and patient engagement. Rather than viewing these approaches as competing systems, clinicians are now challenged to evaluate their respective advantages and determine how best to integrate them. This lecture will highlight strategies for comparing analog and digital workflows, identifying where each excels, and combining them to create predictable, streamlined, and patient-centered outcomes from single crowns to complex rehabilitations.

Learning Objectives:

By the end of this lecture, participants will be able to:

- Compare analog and digital protocols available to dentists across a variety of clinical procedures.
- Evaluate the accuracy and precision of digital protocols in relation to established analog techniques.
- Examine how Dr. K has developed and implemented hybrid workflows that combine analog and digital methods for managing more complex restorative and prosthodontic cases

Dr. Shammick Kotecha

Dr. Shammick Kotecha is a dedicated dental professional with over two decades of experience in clinical practice and leadership within the dental community. He graduated from the University of Manitoba's Faculty of Dentistry in 2000 and completed his residency at The Hospital for Sick Children in Toronto.

In 2006, Dr. Kotecha purchased SGV Dental, where he has since expanded the practice into a state-of-the-art, 10-operatory facility rooted in digital dentistry. His passion for innovation led him to build and later sell Cobblestone Dental Care further solidifying his expertise in modern dental technologies.

A strong advocate for continuing education, Dr. Kotecha served as a Spear Study Club Leader for eight years and is actively involved in professional organizations. He is the President of the Canadian Academy of Restorative Dentistry and Prosthodontics (CARDP) and serves as the Secretary/Treasurer of the Toronto Crown and Bridge Study Club. He has also earned the prestigious Fellowships in both the Pierre Fauchard Academy and the International College of Dentists.

Dr. Kotecha's clinical philosophy centers on digital dentistry and its applications in all aspects of patient care, from restorative and prosthodontic procedures to cosmetic and aesthetic treatments. His commitment to excellence ensures that his patients receive cutting-edge care in a comfortable, technologically advanced setting.

10:00am - 10:30am | Exhibit Hall Break

Dr. Soheil Khojasteh, BHS, DDS,
MSc, Diplomate ADBA

11:00am - 12:00pm

Analgesia and Pain Control in Dentistry

Learning Objectives:

After attending this seminar, participants will have the knowledge to

- Have an understanding of basic pain physiology
- Be familiar with the pharmacology of analgesic medications used in dentistry
- Utilize an algorithm to manage acute dental pain
- Learn about novel analgesics, which may be used in dentistry in the near future
- Calculate the maximum dose of common local anesthetics used in dentistry

Dr. Soheil Khojasteh

Dr. Soheil Khojasteh obtained his Bachelor of Health Sciences at McMaster University in 2010, and then he went on to complete his Doctor of Dental Surgery degree at the University of Toronto in 2014. After dental school, Soheil enrolled in the dental anaesthesiology specialty program at the University of Toronto, Faculty of Dentistry. Soheil is a specialist in dental anaesthesia and a Diplomate of the American Dental Board of Anaesthesia. He is the immediate past President of the Ontario Dental Society of Anaesthesiology, and the current Vice President of the Canadian Academy of Dental Anaesthesiologists. He is a clinical instructor at the University of Toronto, Faculty of Dentistry, in the Department of Anaesthesia, and he has presented to his colleagues in anaesthesia and dentistry at numerous conferences. Soheil currently practices the Procedural Team Anaesthesia model, in which he provides comprehensive dental treatment to his patients under general anesthesia and deep sedation, receive cutting-edge care in a comfortable, technologically advanced setting.

12:00pm - 1:00pm | Exhibit Hall Lunch Break

Dr. Claude Martel

1:00pm - 2:00pm

Introducing e.max Prime Zirconia in The Day to Day CEREC Practice

Description:

Paradigm Shift or Evolution? Join Dr. Claude Martel for a retrospective analysis of two decades of e.max, exploring its impact on modern restorative dentistry. Dr. Martel will also highlight the clinical rationale for incorporating e.max ZirCAD Prime into your practice, providing evidence-based insights and practical strategies for enhancing esthetic outcomes and clinical efficiency.

Learning Objectives:

By the end of this program, participants will be able to:

- Evaluate the clinical performance and evolution of e.max over the past 20 years.
- Identify key material properties and benefits of e.max ZirCAD Prime for contemporary dental applications.
- Understand clinical efficiency, proper handling and manipulation techniques to optimize esthetic results using chairside zirconia
- Explore a range of clinical indications and applications for both e.max lithium disilicate and e.max ZirCAD Prime in daily practice.

Dr. Claude Martel

Graduate from the University of Montréal in 1988, Dr. Martel accounts for more than 30 years of CAD/CAM dentistry with CEREC. He obtained his ISCD accreditation in Berlin in 2004, and has ever since been sharing his passion for chairside indirect dentistry. Today, still in private practice, he is an active KOL and CDOC Mentor for CEREC dentistry. Speaker in several symposiums in North America, Dr. Martel is most proud of having trained over 800 dentist colleagues, both in introductory and advanced CEREC training programs throughout the numerous generations of this game changing technology.

Tarek Sharkas, DDS, MDS, Cert Prosthodontics, FRCD(C)

2:00pm - 3:00pm

"The Tale of Two Implants" Why One Failed and One Succeeded

Description:

In this lecture, I present two full-mouth implant rehabilitation cases—comparable in complexity, yet with drastically different outcomes—that illustrate how biological and mechanical factors intertwine in implant prosthodontics. The first case highlights a complete full-arch restoration where strategic implant placement, optimal load distribution, and a prosthesis tailored to the patient's anatomy resulted in long-term stability. Years later, the implants remain intact, the prosthesis functions without complication, and the patient enjoys restored confidence and quality of life. The second case is a stark contrast and remains an unfolding clinical challenge. The patient developed severe xerostomia (dry mouth) and an underlying bone disease currently under investigation. These systemic and oral conditions triggered progressive implant loss, rampant recurrent caries, and rapid deterioration of the remaining dentition and prostheses. Despite multiple interventions, the patient continues to lose implants one after another, with profound emotional impact—she reports crying daily over her declining oral health. By examining these two cases side-by-side, attendees will see how even technically well-executed prosthodontic work can succumb to uncontrolled biological risk factors. The discussion will focus on prevention, early detection, and patient-specific treatment planning to improve long-term success in complex implant cases.

Tarek Sharkas

Tarek Sharkas is a Canadian prosthodontist and entrepreneur whose work bridges advanced dentistry, robotics engineering, and product innovation. Based in Kitchener, Ontario, he is the founder of Dintoid and the creator of the Elbrus Magma robot—a humanoid platform designed for both healthcare and hobbyist applications. Launched in 2019, the Elbrus Magma project has evolved through multiple design iterations, integrating high-torque servos, AI-assisted walking gait, and advanced sensors including lidar, gyroscopes, and range finders. Tarek's approach combines affordability, modularity, and performance, with specialized versions tailored for professional environments such as dental sterilization bays and customizable setups for enthusiasts. Alongside his robotics work, Tarek is the inventor of the CBI Tray, a patented dental tray system for crown, bridge, and implant procedures, developed under Dintoid's product line. Tarek's engineering portfolio includes teleoperation systems, such as the Magic Hand glove and puppet-style controllers, enabling precise real-time robot manipulation. He is also collaborating with AI specialists to implement reinforcement learning for optimizing humanoid robot walking gaits. Balancing a full-time dental career with his role as a technology innovator, Tarek applies the precision and problem-solving skills of dentistry to the complex challenges of robotics design. His multidisciplinary expertise allows him to create solutions that are both technically advanced and user-oriented. Through his combined work in healthcare and engineering, Tarek is advancing practical robotics for real-world applications while contributing inventive solutions to dentistry—embodying a rare intersection of science, technology, and entrepreneurship.

3:00pm - 3:30pm | Exhibit Hall Break

Jennifer Turner, RDH

3:30pm - 4:30pm

Data Driven Hygiene

Description:

In today's competitive dental landscape, success isn't left to chance, it's measured. Data Driven Hygiene empowers dentists to unlock the story behind their numbers, turning data into decisions that elevate patient care and profitability. This course will show you how to track the right KPIs, close performance gaps, and confidently lead your hygiene team to higher levels of clinical and financial success.

Jennifer Turner

Jennifer Turner's journey in the dental hygiene field is nothing short of remarkable. Jennifer's accomplishments have garnered recognition on both national and global stages. In 2023, she proudly received the prestigious "Educator of the Year" (Speaker) category award from Dr. BiCuspid. Her influence extends globally with Jennifer being named one of the "10 Most Influential Healthcare Leaders to Watch in 2022". Jennifer is currently serving as the Vice President of Dental Hygiene Operations at 123Dentist. Her extensive roles also include Past President and Chief Governance Officer at the College of Dental Hygienists of Ontario, Director of Dental Hygiene Practice with the Canadian Dental Hygienists Association, Director of Dental Hygiene Programs at dentalcorp and a Key Opinion Leader for many leading dental companies. Jennifer is often described as inspirational, knowledgeable, and a dynamic speaker and she is excited to be here with you today.

Dr. Azeem Sheikh, DDS

9:00am - 10:00am

Immediate Molar Implants - Digital workflow from Start to Finish

Description:

In today's modern age, patients are demanding a tooth replacement as soon as possible, minimizing surgical visits, time in the chair and obtaining a final result as fast as possible. With the molar tooth being the most COMMON tooth to fracture requiring replacement, how does one achieve the goal of performing an immediate molar with as much predictability and ease as possible?

Recent advances in instrumentation, technique, materials and protocol can help to achieve the immediate molar implant your patient wants! The use of guided surgery can also help in minimizing surgical time, predictability and maximizing accuracy when performing this procedure.

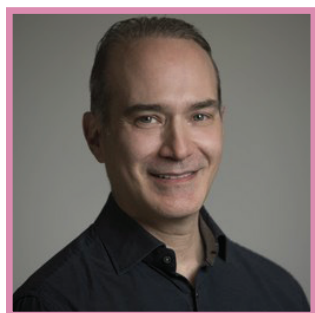

Join me as we explore what is now POSSIBLE with immediate molar implants!

Dr. Azeem Sheikh

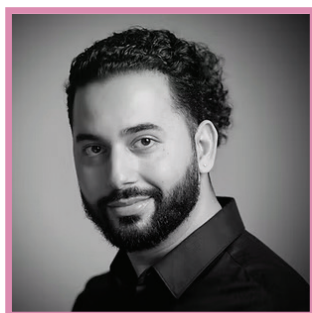

Dr. Azeem Sheikh, DDS, graduated from the University of Western Ontario in 2003 and completed Implant Training at the University of Toronto in 2005. He runs a referral-based practice in Brampton focused on immediate implant surgery, has placed over 6,000 implants, and is the founder of the Ontario Dental Implant Network.

CBCT Use for The General Practitioner in Dentistry; How This Technology Can Improve Your Clinical Game!

Description:

A Case Discussion

Dr. Waji Khan

Dr. Khan grew up in Scarborough, Ontario. After graduating from high school he attended the University of Toronto, Trinity College and graduated with a Bachelor of Science with High Distinction in 1997. He then attended The University of Toronto Faculty of Dentistry and graduated with his Doctor of Dental Surgery in 2001. Dr. Khan served as a dental officer in the Canadian Forces from 1998-2007. Dr. Khan began practicing dentistry in Halifax, Nova Scotia with the Canadian Forces. In the CF he learned a lot through mentorship with dental specialists and advanced dental training courses. After a ten year career in the Canadian Forces, he then moved to Kingston with his wife and life partner Dr. Sohela Vaid in 2007 to pursue studies in Medicine and practice Dentistry.

Mark Chan, *DD*

2:30pm - 3:30pm

Using Digital Dentistry to Solve Everyday Aesthetic Challenges in General Dentistry

Description:

This session will go over the use of the modern digital dentistry tools in various clinical cases

- Data Acquisition IOS, what to capture
- Facial Scanning and its uses
- 3D Printing and Prototyping
- Final material selection
- Insertion, Isolation and Bonding protocols

Mark Chan

Mark Chan received his diploma from Denturism in Toronto at George Brown College with honours. Currently Mark is practicing in Ontario with a main focus on high-end removable and implant prosthetics.

With a passion for both technical and clinical techniques he is certified in Bio-logic, BPS and SDC denture concepts and is a ZunstZhanWerk "Art of Denture" award winning Denturist, he is a sought after consultant and opinion leader in the Denturist and Lab community.

Dr. Jason Adinata

Dr. Jason is a firm believer in finding beauty in what you do. Born in Toronto and raised in Scarborough, Dr Jason wanted the people of the community to experience Artisan Dentistry. Following the completion of his dental degree with high distinction at the University of Toronto he has had the opportunity to travel the world and learn from industry leaders.

Dr Jason completed an Advance Education in General Dentistry residency at the Eastman Institute for Oral Health in Rochester, has trained at Spear Education in Scottsdale and at the KOIS Center in Seattle. Dr Jason's constant pursuit for excellence has now led him to the world renowned King's College in London, England where he will obtain his Masters in Aesthetic Dentistry.

Dr. Morley S. Rubinoff
Prosthodontist

4:00pm - 5:00pm

Predictable Results with Occlusal Or TMJ Dysfunction

Course Objectives:

TMJ dysfunction is only a small part of the problem dentists deal with daily. There are so many other occlusal discrepancies that impact on our dentition. Never-the-less, dental care may lead to TM joint dysfunction if occlusal discrepancies result from restorative treatment.

In this lecture we will examine how restorative dentists correct malocclusion in the dentate, edentulous and implant supported dentitions. Hands-on sessions will supplement didactic presentations.

Young dentists and seasoned veterans will benefit from this presentation.

Topics Covered:

- Vertical Dimension of Occlusion
- Occlusal loading on both dentate and implant prostheses
- Collapsed posterior tooth support, the "roller coaster plane of occlusion"
- Myofascial Pain Dysfunction
- TM joint Dysfunction

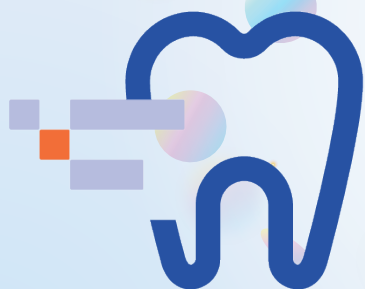

Dr. Morley S. Rubinoff

Dr. Rubinoff is a graduate of the Faculty of Dentistry, University of Toronto (1974). Dr. Rubinoff completed a post-doctoral program in Prosthodontics from the State University of New York at Buffalo in 1984. Dr. Rubinoff has served as the President of the Association of Prosthodontists of Ontario, The Association of the Prosthodontists of Canada and is the founding President of the Canadian Dental Protective Association. He has been awarded the Certificate of Merit by the Canadian Dental Association and received a fellowship from the Academy of Dentistry International. Dr. Rubinoff was an instructor/mentor at the Faculty of Dentistry, University of Toronto in the Graduate Department of Prosthodontics. Dr. Rubinoff is a Senior Fellow of the International Team for Implantology (ITI).

Peer Circles And Professional Excellence – The RDT Is The Subject Matter Expert And Voice Of The Profession

Description:

The College of Dental Technologists of Ontario (CDTO) and the Association of Dental Technologists of Ontario (ADTO) are working in partnership on an innovative peer-facilitated group discussion activity using hypothetical practice relevant cases. Peer circles provide Registered Dental Technologists (RDTs) with a rewarding opportunity to work together in small groups to address challenging and complex, topical practice issues, and develop enhanced problem-solving approaches and strategies. Practising RDTs will act as facilitators to guide small groups of practitioners to consider instructive cases or issues that highlight challenging and complex professional and practice issues. Each member of the group will share their perspectives on how they would solve those complex issues. The College of Dental Hygienists and the College of Denturists run the Peer Circle program that qualify for continuing professional development CPD). Oral health practitioners report that peer circles:

- Support continuous learning and improvement in a professional's practice and in a non-traditional way.
- Provide registrants with an opportunity to interact and consult with colleagues in a way that reduces the impact of professional isolation.
- Facilitate an open exchange of ideas, improve professional and practice knowledge and allow for learning from more experienced practitioners.
- Encourage everyone to participate and facilitators ensure that those who have a contribution are given an opportunity to express it.
- Use case studies that promote discussion of elements related to standards of practice, approaches to treatment and interprofessional communication strategies.
- Provide registrants with an opportunity to reflect upon issues that arise in their everyday practice and share thoughts about the application of professional and practice standards and guidelines.

Karim Sahil

Karim Sahil, RDT, MDT, earned his Dental Technology certificate at George Brown College and later achieved his Master Dental Technologist certificate in New York. He operates a dental laboratory at Yorkville Village Dentistry, provides advanced restorative services, and serves as President of the Association of Dental Technologists of Ontario.

Christopher Ji

A proud graduate of George Brown College's RDT program, Christopher brings over 15 years of hands-on experience as a dental lab technician. His deep-rooted passion for dentistry and pursuit of excellence have led him to transition into the sales field, where he's focused on connecting clinicians and technicians with innovative dental solutions. Known for his attention to detail and commitment to service, Christopher is excited to share his technical expertise in a way that adds real value to dental practices and labs alike.

Judith Rigby

Judith Rigby, CPA, has over 20 years of executive leadership experience and has served since 2014 as Registrar and CEO of the College of Dental Technologists of Ontario. She is Chair of the Canadian Alliance of Dental Technology Regulators and is recognized nationally for advancing equity, labour mobility, and patient safety in health profession regulation.

Dora Rodrigues, DT

**10:00am - 11:00am****Fast And Flawless : Mastering The Full Arch Digital Workflow**

Description:

Learn the different techniques for AoX conversions and how to choose the right full arch digital workflow for predictable, fast and high-quality results. This lecture covers proven techniques, time-saving design software strategies, and practical tips to streamline your process without sacrificing accuracy.

Dora Rodrigues

Originally from Portugal, Dora Rodrigues graduated as a Dental Technician in 2004, at the Faculty of Dentistry -University of Lisbon, Portugal. She worked for the Malo Clinic Group (pioneers on the A04 treatment concept) for 16 years, until she opened ID Dental Studio, a laboratory dedicated exclusively to full arch restorations and A0X conversions. She specializes in chairside assistance in both analog and digital A0X workflows. She is a KOL for several companies, certified exocad trainer, ambassador of the NightShift group, DTG official member and member of the Jersey Coast Seattle Study Club.

**11:00am - 11:30am | Exhibit Hall Break**

Jennifer Dibben, RDT

**11:30am - 12:30pm****“Just Build a Digital Workflow,” They Said. “It’ll Be Great,” They Said...And it Can Be – If You Know the Whole Story**

Description:

In today's fast-moving digital landscape, it's easy to feel overwhelmed by polished lectures, picture-perfect case photos and marketing messages that make digital workflows look deceptively simple. But the reality for many clinicians and labs is more complicated – and more paralyzing. The fear is making a costly mistake (or worse, making one and not realizing until it's too late) often leads to inaction. And inaction, as we know, is a decision – with consequences. This session is about cutting through the floss to give you a complete, honest education on building a digital denture workflow – for both fixed and removable solutions. We'll not only walk through the fundamentals but also highlight the commonly glossed-over nuances and practical realities that can make or break your cases. These are the things that don't always make it into the pamphlets or podium talks, but they absolutely should.

Jennifer Dibben

Jennifer graduated George Brown College in 1998, received her RDT designation in 2000 and went on to work in both production and boutique laboratory atmospheres.

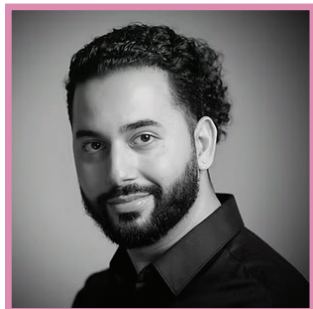

She has been a member of the board of the ADTO and opened Belasco Dental Studio in 2004.

She has lectured internationally for Nobel Biocare for both the Nobel Rondo Porcelain System and All-on-X restorative processes.

Currently she is building Rising Tide Dental Lab with Adam McCabe, DD.

When she's not working she loves hanging with her kids.

Karim Sahil, RDT, MDT

1:30pm - 2:30pm

Dental Technologist - Dentist Simplifying Modern Day Ceramics Using Technology

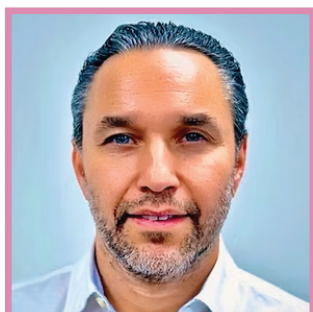

Description:

In this lecture we will be learning modern day communication between a Dental technologist and a Dentist and why its crucial in succeeding to provide a full mouth rehabilitation.

- Implant planning and placement using surgical guides
- Accurate Digital images of teeth and oral structures using photogrammetry
- Full mouth reconstruction using Kois Facially generated maxillary cast transfer
- Digital cut back using ceraMotion CADback
- Application of ceraMotion 2d/3d/pink pastes
- Patient case studies

Karim Sahil

Karim Sahil has earned his RDT, MDT, and acquired his Dental Technology certificate at George Brown College. As a Registered Dental Technologist, he earned a certificate of mastery on all five components of Dental Technology, including ceramics, crown and bridge, dentures, partial dentures, and orthodontics. He gained his Master Dental Technologist certificate from New York, USA, on the study of mandibular physiology, occlusion, and full mouth reconstruction. He maintains a dental laboratory in a dental clinic at Yorkville Village Dentistry. He provides services that include cosmetic dentistry, fixed implant restorations, and advanced full mouth restorative prostheses for dentists and oral specialists. He is also the president of the Association of Dental Technologists of Ontario.

Alex Chabachevitch, RDT

2:30pm - 3:30pm

Finding New Solutions To Our Everyday Challenges In The Everchanging Dental World

Description:

- Finding the perfect restorative solutions for your patients, an overview of various options addressing, Aesthetics, Hygiene and Strength
- Discuss how the introduction of CAD/CAM has impacted restorative workflow options
- How clinicians can keep up with the rapid advancements made in the dental industry. This "Dental Jungle" is a huge challenge for many clinicians, so many questions and unknowns. We will address some of these solutions for clinicians to help them navigate this daunting road of the future.

Alex Chabachevitch

Alex Chabachevitch is an experienced and successful owner of a medium sized dental lab in the GTA. He has over 20 years of experience managing his lab. The main focus of his workflow being on implantology, crowns, bridges, digital dentistry including digital dentures. Alex is also a partner in Unique Dental Supplies Inc.

Vita Vionic DentDisk: Uses and Applications in The Modern Day Lab

Description:

This presentation delves into the uses and applications of Vita Vionic DentDisk in modern dental laboratories, highlighting its role in digital denture fabrication. It will cover key features such as material composition, strength, and esthetic benefits, as well as its compatibility with CAD/CAM workflows. The session will explore its applications in full and partial dentures, implant-supported prosthetics, and efficient digital production techniques. Attendees will gain insights into how Vita Vionic DentDisk enhances precision, consistency, and patient outcomes in contemporary dental labs.

Mark Chan

Mark Chan received his diploma from Denturism in Toronto at George Brown College with honours. Currently Mark is practicing in Ontario with a main focus on high-end removable and implant prosthetics.

With a passion for both technical and clinical techniques he is certified in Bio-logic, BPS and SDC denture concepts and is a ZunstZhanWerk "Art of Denture" award winning Denturist, he is a sought after consultant and opinion leader in the Denturist and Lab community.

Kaveh Shams, DT

9:30am - 10:30am

Minimal Thickness, Maximum Aesthetics, Exploring Prettau® Skin® Veneers in Clinical and Lab Practice

Description:

Discover how ultra-thin zirconia veneers can redefine aesthetic dentistry by joining DT Kaveh Shams for a comprehensive session introducing the complete protocol for creating 0.2 mm Prettau® Skin® veneers using minimally invasive techniques. Based on real patient cases, the lecturer will walk through each step of the workflow – from shade matching and custom preparation guides to layering and final placement. The lecture also includes a sneak peek at Zirkonzahn in-house software that streamlines the digital design process.

Kaveh Shams

Kaveh Shams graduated as a Dental Technician from Lambeth College – in London, UK, in 2010. Since then, he has worked in multiple dental laboratories in London and Toronto. In recent years, his passion for digital dentistry has led him to take responsibility as a CAD-CAM Specialist supporting and coaching dental community members across Canada. He continues serving the dental community as Zirkonzahn's ambassador and branch manager.

Eyal Geiger, CEO of 3D Prime Tech

Mr. Fatih Arikcan

Helen Tran, RDT

11:00am - 12:00pm

A New Streamlined Workflow For Partial & Denture Digital Design & 3d Printing Production— Powered By Exocad, Imes-icore & TRUMPF

Description:

Discover a powerful, streamlined digital workflow for designing and producing partial dentures and full dentures using the latest advancements with exocad QuickSnap and 3D printing. This lecture highlights how exocad's intuitive design platform integrates seamlessly with IMES-ICORE and TRUMPF's cutting-edge additive manufacturing technologies. Learn how to optimize each step, from digital design to final print, for accuracy, efficiency, and repeatability. Ideal for dental professionals looking to modernize their removable prosthetics workflow.

Eyal Geiger

Eyal Geiger is the Founder and CEO of 3D Prime Technologies Inc., bringing over 20 years of experience in advanced manufacturing and healthcare technology. Through partnerships with global innovators such as TRUMPF, Stratasys, exocad, and Oqcam, he delivers end-to-end digital dental solutions in 3D printing, precision milling, and AI-driven workflows.

Mr. Fatih Arikcan

Fatih Arikcan is a Senior Additive Manufacturing Engineer at TRUMPF, Inc., where he leads all Dental Applications for North America. With over eight years of experience in metal 3D printing and more than 200 customer projects worldwide, he specializes in optimizing workflows and enhancing productivity with TRUMPF Metal Printers.

Helen Tran

Helen Tran, RDT, is a graduate of George Brown College with expertise in removable appliances, particularly partial frameworks. She integrates digital technologies such as metal 3D printing into denture and orthodontic workflows and educates dental laboratory professionals on adopting digital solutions.

12:00^{pm} - 1:00^{pm} | Exhibit Hall Lunch Break

Michael Suris, CDT

Aidite

1:00pm - 2:00pm

Advancing Digital Denture Workflows: Techniques for Precision and Efficiency

Description:

Join Aidite Technical Director Michael Suris, CDT, for an in-depth look at the latest advancements in digital denture workflows. In this comprehensive lecture, Michael will guide attendees through each step of the modern digital process—from initial scan to final delivery—demonstrating how to leverage today's technology for more accurate, efficient, and esthetic results.

You'll learn how to capture precise scans for removable prosthetics, optimize your designs, and utilize Aidite's advanced milling systems and materials to fabricate durable, high-quality dentures. Whether you're new to digital dentures or seeking to refine your current approach, this session offers actionable insights into reducing turnaround times, improving fit, and increasing consistency in your lab's production.

With decades of hands-on experience, Michael brings a practical perspective rooted in real-world application—sharing tips, troubleshooting guidance, and strategic workflow enhancements. This is a must-attend session for labs and technicians aiming to elevate their digital denture capabilities and stay ahead in a competitive market.

Don't miss the opportunity to learn from one of the industry's leading experts in digital prosthetics and take your removable workflow to the next level.

Michael Suris

With over 20 years of experience, Michael is a seasoned expert in advanced CAD/CAM dental technology, driven by a passion for education and support within the dental community. Currently serving as Aidite's Technical Director, he continues to be an advocate, beta tester, and Key Opinion Leader, bringing a thorough knowledge of digital dentistry. Michael's expertise extends to various dental materials and software, as well as extensive experience in designing, milling, and printing complex dental restorations. With accreditation from the National Board of Certification in Dental Technology and training in infection control protocols, he is dedicated to advancing the field of digital dentistry while prioritizing efficiency and technical advancements.

Kevin Stuart, Product Manager,
Quatro Air Technologies

2:00pm - 3:00pm

"Better Air Quality Makes Dollars And Sense" What You REALLY Need to Know

Description:

This presentation explores the hidden health and financial risks of poor air quality in dental labs. Attendees will learn how dust, fumes, and 3D printing byproducts impact worker safety, equipment lifespan, and productivity. The session covers how to choose the right air purification solutions - from source capture to recirculation - based on specific lab needs. Real-world examples and data will help attendees make informed decisions to improve air quality and reduce costs.

Kevin Stuart

My name is Kevin Stuart, and I'm the Product Manager at Quatro Air Technologies. I graduated in Mechanical Engineering from Concordia University in Montreal, QC, in 2019. I've been with Quatro for five years, starting just as the COVID-19 pandemic began. That timing quickly highlighted the importance of air purification and the many health concerns end users face across a wide range of industries. Working for a manufacturer has given me the freedom to combine technical knowledge with creativity - helping design filtration systems while learning about diverse applications. I believe that truly understanding the application is the most important step in delivering the best possible solution.

Andre Gaul, CDT

3:30pm - 4:30pm

3D Printing in The Lab: Improving Results

Description:

This technical lecture aims to inform 3D printer users about the behavior of resin in order to optimize the accuracy of their models and printed parts.

Andre Gaul

André Gaul, CDT is Director of Dental Technologies at DenPlus Inc. A 2018 graduate of the dental prosthetics program at C.E.M., during which he earned two scholarships, he was captivated by digital dentistry early on. When presented with an opportunity to contribute to DenPlus's foray into digital technologies, he jumped at the chance. He has since become heavily involved in CAD and 3D printing, has written a few articles on the subject, and, in 2024, gave his own training on 3D printing in the laboratory to dental prosthetics teachers at Cégep Edouard Montpetit, with the aim of enabling them to integrate 3D printing into the curriculum.

Dr. M. K. (Bobby) Baig, BDS.,
AEGD., Cert Prosthodontist, F.R.C.D.(C).

4:30pm - 5:30pm

Lab Communication and Prosthetic Errors And Their Consequences in Implant Dentistry

Description:

Effective collaboration between the clinician and the dental laboratory is a cornerstone of predictable implant prosthodontics. This lecture is designed to highlight the critical role of accurate communication, documentation, and execution in minimizing prosthetic complications and ensuring long-term clinical success.

Participants will explore common pitfalls in lab communication, recognize how errors in impression-taking, records transfer, material selection, and prosthesis fabrication can lead to clinical failures, and learn strategies to prevent them. The program emphasizes real-world case scenarios, practical guidelines, and evidence-based approaches to improve the quality of clinician-technician collaboration.

Dr. Bobby Baig

Dr. Baig received his dental degree from Gulbarga University, India in 1997, completed his residency in Hyderabad, and pursued advanced training in General Dentistry and Prosthodontics at the University of Rochester, New York. He is Clinical Director of Prosthodontics and Associate Professor at the University of Rochester, a Clinical Instructor at Mount Sinai Hospital, and Associate in Dentistry at the University of Toronto, while maintaining private practices limited to prosthodontics and implant dentistry in both Canada and the USA. Board-certified in Canada, he has served as a national examiner for the NDSE and the Royal College of Dentists of Canada, and has received numerous honors including the University of Rochester Faculty Award for Excellence in Teaching (2019), the International Academy for Dental Facial Esthetics Fellowship (2021), and the Pierre Fauchard Academy Fellowship (2025). Widely published and an international lecturer, Dr. Baig's clinical interests include dento-facial aesthetics, implant dentistry, prosthodontics, dental ceramics, smile makeovers, and advancements in digital and AI dentistry.

Leonid Gurgov

Leonid Gurgov earned his Advanced Diploma from George Brown College in 2010 and, in 2011, became the youngest professional in Ontario to be granted the title of Registered Dental Technician. He is an active member of ADTO, CDTO, DTA, ADIA, and ICOI, and has studied under world-renowned dental technicians including Lee Culp, Oliver Brix, and Klaus Mütterthies. In 2022, he was elected as a Fellow of the International Academy for Dental Facial Esthetics in recognition of his contributions to advancing dental esthetics. Known for his expertise in CAD/CAM applications, implant-supported restorations, and highly aesthetic outcomes, Leonid plays a key role in treatment planning, quality control, and the application of innovative materials and techniques to produce restorations of the highest quality.

ENTER FOR YOUR CHANCE TO WIN

DRAW PRIZES

women in dentistry
Work. Life. Balance.

1-YEAR MEMBERSHIP

Your Passport to winning BIG!
Get minimum of 12 stamps to be eligible for the draw prize.
SDT PASSPORT IS IN YOUR WELCOME BAG.

Don't forget to drop your stamped page in the drum by 5PM!

TERMS AND CONDITIONS

Eligibility: Open to all registered attendees of Spectrum Day Toronto on November 7th, 2025

How to Enter:

- Participants must collect stamps by visiting at least 12 exhibitor booths (companies that participated in the draw are listed on the coupon booklet) during the event. Each exhibitor booth will provide one stamp per participant on the designated page in the coupon booklet.
- Stamps must be collected from participating exhibitor booths only during the exhibition hours 10:00 am-5:00 pm. (Lost or damaged coupons will not be replaced)

Submission:

- Completed stamp page with the full name and email must be submitted to the designated prize collection area by 5:00 pm. (Late submissions will not be accepted)
- Only fully completed coupons (with 12 stamps) will be eligible for the prize draw.

Prize Draw:

- The draw will occur during the cocktail hours 5:30 pm - 7:30 pm and winners will be randomly selected.
- Participants must be present at the time of the draw to claim their prize. If a winner is not present, an alternate winner will be drawn. (Prizes are non-transferable and cannot be exchanged for cash or other items)

General:

- By participating, attendees agree to abide by these terms and conditions.
- The event organizers reserve the right to disqualify any entry that does not comply with these terms.

- The decision of the event organizers in all matters related to the draw is final and binding.

Liability:

- The event organizers are not responsible for any loss, damage, or injury sustained by participants as a result of entering the prize draw or accepting any prize.

Privacy:

- Personal information collected for the purpose of the draw will only be used for prize distribution and will not be shared with third parties.

Prizes:

- Studio 6 Interior Design Package (valued at \$8000) Sponsored by Studio 6
- Air Canada \$1000 Travel Voucher
- iPad (A16) 11-in 128gb (valued at \$499) Sponsored by Excel Dental
- Blue Jays Ticket (valued at \$400) Sponsored by Dentiza
- Oral-B iO & Water Flosser Patient System (valued at \$399) Sponsored by Oral-B
- Women In Dentistry 1-Year Membership (valued at \$349) Sponsored by Women In Dentistry
- LCBO Gift Card (valued at \$100) Sponsored by Patterson Dental
- Jo Malone Gift Bag
- The Keg Gift Card
- Uber Gift Card

9:00am - 10:00am

Staffing And HR Management for A Thriving Dental Team

Description:

In this session, participants will gain actionable strategies to address common staffing challenges and create a stable, growth-oriented team environment.

Alex Zlatin

As CEO, Alex Zlatin helps struggling dental professionals take control of their practices and reach the next level of success with responsible leadership strategies. Leveraging over 15 years of management and consulting experience, he empowers organizations to become more productive and profitable based on the belief that successful businesses establish a genuine connection with employees, patients, and vendors. Alex volunteers his time and expertise with various professional organizations, has launched the Dental Office Managers Association of Canada and is the author of Responsible Dental Ownership: Balancing ethics and business through purpose available on Amazon.

Savannah Koran

Savannah began her dental journey over 20 years ago, with a background in both clinical and operational roles. Having firsthand experience with the challenges of finding great talent, she co-founded U R Hired with Alex Zlatin. Savannah is deeply involved in various aspects of the dental industry, committed to finding effective solutions for your team.

10:00am - 10:30am | Exhibit Hall Break

Tanya Little, DD

10:30am - 11:30am

Thoughts from A Denturist, Creating Dentures for 20 Years!

Description:

Join us for an insightful discussion on the latest advancements in denture manufacturing, focusing on the new and innovative solutions provided by Ivoclar. This session will cover the comprehensive range of technologies Ivoclar offers, highlighting both the benefits and challenges faced by dental professionals in the field. Let's talk about the strengths and limitations of Ivoclar's systems - then and now, providing practical insights for optimizing their use in clinical and lab settings.

Tanya Little

Denturist, Tanya Little is the owner of Envision Denture and Implant Centre near Vancouver BC, Canada. She has been a Denturist for over 20 years, and during this time she has received ongoing training and education from around the world. Tanya has a keen interest in digital Denturism and started tinkering with digital denture solutions back in 2016. She is enthusiastic about Smile Design for Dentures, Trios intra-oral scanning, 3D printing and milling dentures. Her practice currently uses two Trios IOS, an F8 desktop scanner, Asiga 3D printers and PM7 for manufacturing. 3Shape scan/design software is her preferred choice. Tanya is a KOL for Asiga and Ivoclar and she is always looking for creative, new ways to use digital technology in her clinic.

Milan Jovanovic, RDT

Francesca Girardo, RDT, DD

11:30am - 12:30pm

Implant-Supported Dentures from Start to Finish: A Denturist's Perspective

Description:

This session offers a comprehensive overview of the implant-supported denture process—from initial assessment to final prosthetic delivery. Presented from a denturist's perspective, the lecture will guide attendees through treatment planning, clinical techniques, and the transition from removable to fixed full-arch solutions.

A key focus will be the integration of photogrammetry, a cutting-edge digital workflow that enhances precision, efficiency, and patient outcomes in implant prosthetics. Attendees will gain valuable insights into how this emerging technology is reshaping the way we approach full-arch rehabilitation.

Ideal for clinicians seeking practical guidance and modern approaches to implant-supported dentures.

Milan Jovanovic

Milan Jovanovic completed the Dental Technician program at George Brown College in 2007 and became a licensed RDT in 2011. He has worked in small, mid-sized, and large laboratory environments, including more than six years in a GP office's on-site lab, where he gained valuable clinical perspective on implant prosthetics. With over nine years of CAD/CAM experience, including Noble Procera, Dental Wings, Sirona Cerec, 3Shape, and Itero, Milan has developed extensive expertise in digital workflows between labs and clinics. Since 2018, he has contributed his skills to the Lab Division of Straumann Group.

Savannah Koran

Francesca Girardo, RDT, DD, graduated from George Brown College with a Diploma in Dental Technology in 2016 and completed her Denturism program in 2019. That same year, she earned her RDT and DD designations and began working alongside Dr. Donald Somerville in his Prosthodontic practice, gaining extensive laboratory and clinical experience. Francesca now serves as both Head Denturist and Dental Technician at Crescent Oral Surgery, where she leads the development of the prosthetic component of the practice. She has been extensively involved in All-on-X cases, including numerous All-on-4 and immediate-load single restorative procedures.

12:30pm - 1:30pm | Exhibit Hall Lunch Break

Philip Segal, Director of Digital Development & Special Projects at Keystone Dental

1:30pm - 2:30pm

Denture Conversion Simplified: The EasyPro Protocol for Predictable Outcomes

Description:

This lecture offers a comprehensive overview of the EasyPro system from Keystone Dental, designed to streamline full-arch denture conversions and immediate loading procedures. We will explore how EasyPro simplifies the transition from removable dentures to fixed prosthetics, improving both clinical efficiency and patient satisfaction.

Philip Segal

Philip Segal is a seasoned dental professional with more than three decades of experience in implantology and currently serves as Director of Digital Development & Special Projects at Keystone Dental. His expertise spans digital dentistry, guided implant planning, intraoral scanning, CAD/CAM prosthetics, and immediate prosthetic techniques. At Keystone Dental, he focuses on advancing surgical and restorative workflows through innovation, supporting clinicians in achieving optimal results with implant systems such as Genesis Active. Widely regarded for his clinical support, training, and professional education, Philip is committed to advancing precision and patient-centered care through emerging technologies.

2:30pm - 3:00pm | Exhibit Hall Break

Dean Fenwick, *Founder,*
Specialized Office Systems Inc.

3:00pm - 4:00pm

Artificial Intelligence - Powered Practice Management with DOMx

Description:

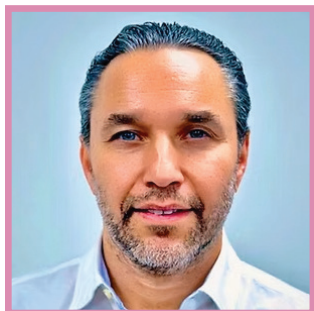

Step into the future of clinical efficiency with Dean Fenwick, founder of DOMx and a long-time advocate for innovation in the denturist profession. This dynamic one-hour session will explore how artificial intelligence is beginning to reshape practice management—making patient charting faster, appointment scheduling smarter, and team workflows more streamlined.

Using real-world examples from DOMx, Dean will demonstrate how tools like AI-assisted SOAP note generation, digital consent forms, and intelligent reminders can improve accuracy, save time, and reduce administrative fatigue. You'll also get a sneak peek at emerging features that promise to revolutionize how clinics operate.

Whether you're already using DOMx or just curious about what AI can do for your practice, this session will leave you inspired and equipped with ideas. The focus is practical, the outlook is forward-thinking—and the opportunities are closer than you think.

Dean Fenwick

Dean Fenwick is the founder of Specialized Office Systems Inc., the company behind DOMx—a leading practice management system designed specifically for denturists: www.denturistsoftware.com. A pioneer in the field, Dean has played a pivotal role in the development and adoption of electronic claim submissions for denturists since their inception. He spent several years teaching practice management to denturist students at NAIT and remains an active supporter of denturist education across Canada. As a passionate advocate for the profession, Dean is deeply committed to the growth, efficiency, and long-term success of denturist practices. With technology advancing rapidly, Dean believes denturists shouldn't just adapt—they should lead the way. His work continues to empower clinics to embrace innovation, streamline operations, and deliver outstanding patient care.

Alex Chabachevitch, *RDT*

Andreas Klie, *RDT*

4:00pm - 5:00pm

Integrating Photogrammetry in Intraoral Procedures

Description:

- All on X procedures
- Integration with AI
- Streamlining digital workflows
- Increased adoption in Clinical practice

Alex Chabachevitch

Alex Chabachevitch is an experienced and successful owner of a medium sized dental lab in the GTA. He has over 20 years of experience managing his lab. The main focus of his workflow being on implantology, crowns, bridges, digital dentistry including digital dentures. Alex is also a partner in Unique Dental Supplies Inc.

Andreas Klie

Andreas is a Registered Dental Technologist with over 35 years of experience in the dental field. Andreas graduated from Technikon School of Dental Technology in South Africa in 1986. He founded La Lucia Dental Laboratory in 1991 and operated it until he immigrated to Canada in 2001. In 2005, he became an RDT in Ontario. Andreas plays a major role in Panthera Dental's strategy to incorporate more technical guides and articles into its portfolio. His experience as a dental technologist, combined with his field experience, allows him to offer customers precise and detailed solutions on a more technical level.

Pam Rehm, RDT

11:00am - 12:30pm

Optimizing Digital Denture Design for Milling: Material Insights and Workflow Efficiency

Description:

As digital denture technology evolves, milling plays a crucial role in modern workflows. This session delves into designing for milling, exploring material considerations, and the expanding options available. Discover how to enhance design efficiency, precision, and long-term success while navigating the strengths and limitations of various materials. Whether you're new to milling or outsourcing your manufacturing, gain insights to make informed decisions that align with your clinic's requirements.

Pam Rehm

Pam Rehm is a Registered Dental Technologist with over a decade of experience in removable workflows. Since 2014, she has been at the forefront of digital removables workflows, starting with designing full arch implant bars and restorations. Her commitment to advancing dental technology is evident in her previous contributions to local denturist study groups and her extensive lecturing and training across North America. Pam now works with Argen Canada and specializes in integrating digital manufacturing workflows with clinical and patient workflows, creating optimized and seamless denture clinics transitioning from analog methods.

Youhanna Salib, *Director of Consulting Services at IPAC Consulting*

3:30pm - 4:30pm

Protect Your Practice: A Denturist's Guide to Acing IPAC Audits

Description:

This session is designed specifically for denturist owners and operators, and their staff, who carry the responsibility of ensuring their practice meets IPAC standards — whether they're onsite every day or not.

You've already put in the work: bought the right equipment, trained your team, and followed best practices. But inspections aren't just about what you do — they're about what you can prove.

Youhanna Salib

Youhanna Salib is the Director of Consulting Services at IPAC Consulting with over five years of experience implementing IPAC programs across diverse healthcare settings, including hospitals, long-term care and retirement homes, dental and surgical centers, and community health environments.

A recognized educator and speaker, Youhanna has presented at numerous conferences, sharing practical strategies to help healthcare teams meet regulatory requirements and integrate effective infection prevention practices into their daily operations. His expertise spans routine practices, environmental controls, sterilization and reprocessing, outbreak prevention, and risk management.

Certified in IPAC by the University of British Columbia and holding a Lean Six Sigma Green Belt, Youhanna combines technical knowledge with process improvement skills to deliver sustainable solutions. His work focuses on empowering healthcare teams with the tools and education needed to reduce infection risks, protect patients and staff, and maintain compliance with industry standards.

Through his hands-on experience in multiple care environments, Youhanna brings a comprehensive perspective on infection control, making him a trusted resource for organizations seeking practical and effective approaches to patient safety.

Tyler Di Cristofaro, *Health and Safety Specialist*

4:30pm - 5:30pm

Know Your Role: Health & Safety Legal Duties for Denture Clinic Owners

Description:

This session is for denturist clinic owners and operators who employ staff — whether one assistant or a small team. If someone works for you, even part-time, you carry legal responsibilities under Ontario's Occupational Health and Safety Act (OHSA).

This isn't just about avoiding fines — it's about knowing your role in protecting your people, staying compliant, and demonstrating due diligence.

Tyler Di Cristofaro

Tyler Di Cristofaro is a Health and Safety Specialist with over a decade of experience supporting organizations across Ontario. He holds formal training in Occupational Health and Safety from Seneca College and has led numerous safety and compliance initiatives across a variety of sectors.

Tyler enjoys consulting within healthcare and community settings, helping teams strengthen workplace safety programs, meet compliance standards, and foster a culture of accountability and care. Known for his approachable and practical style, Tyler brings real-world insight to every session he leads.

9:00am - 9:50am

From Gums to Heart: Optimizing Periodontal And Peri-Implant Health Through Monitoring, Microbiome Balance, And Non-Invasive Therapies

Description:

This presentation explores the interconnected roles of periodontal and peri-implant inflammation, the oral microbiome and oral dysbiosis, and their systemic impact on cardiovascular health. It reviews evidence-based strategies for effective clinical monitoring of periodontal health, highlights the significance of oral-systemic pathways, and evaluates emerging non-invasive therapeutic modalities such as probiotics and laser technologies. The talk emphasizes integrative, preventive care to support both oral and overall health.

Dr. Michael Glogauer

A distinguished figure in periodontology and dental research, Dr. Michael Glogauer combines groundbreaking research with exemplary clinical care at the forefront of dental health innovation.

Kerry Lepicek, RDH

9:50am - 10:50am

Unlocking The Bright Smile: A Comprehensive Guide to Teeth Whitening in Dental Practices

Description:

Join Kerry as she delves into the business of teeth whitening in dental practices. She will review in-office and take-home techniques and products, providing insights to enhance patient experience and create additional revenue. Kerry will cover patient selection, appropriate indications and side effect management. Discover the powerful benefits of integrating teeth whitening with orthodontic, restorative, and periodontal treatments for a comprehensive approach to dental care.

Kerry Lepicek

Kerry Lepicek is a registered dental hygienist with over 20 years of clinical experience. She works at Clinical Research Dental as a Clinical Specialist in Dental Hygiene and Education and works part-time in general practice. She has lectured locally and internationally and is a cast member on The RDH View. Kerry is knowledgeable on the topics of oral biofilm, the oral-systemic connection, teeth whitening, and the dental hygiene process of care. Her focus is on educating her clients and the dental profession on health and wellness. She sits on the Research Advisory Committee for ODHA, The RDH Magazine Advisory Board and is a section editor for The Hygiene Corner with Women in Dentistry. Recently, she received the Distinguished Services Award from ODHA for outstanding contributions to the dental hygiene profession. Her practical advice will transform your practice and patients' health.

10:50am - 11:20am | Exhibit Hall Break

Dr. Luciana Arcaro

11:20am - 12:10pm

Achieving & Sustaining IPAC Compliance: Best Practices

Objectives:

- Identify key regulatory requirements and standards for IPAC
- Develop the understanding of effective methods for collecting and utilizing IPAC data to monitor and improve compliance
- Recognize common challenges in achieving compliance and strategies to overcome them
- Demonstrate how IPAC compliance contributes to risk mitigation, legal protection, and improved patient outcome

Dr. Luciana Arcaro

Dr. Luciana Impala Arcaro is a highly accomplished dental professional and business strategist with expertise spanning clinical education, dental technology, and corporate development. She holds a BDS, a Dental Technology Degree with honors, specialized training in Advanced Orthodontics and Prosthodontics, and an Executive MBA. Dr. Arcaro has held senior leadership positions across North and Latin America, including Director of Clinical Affairs and Director of Education for leading dental organizations, where she has developed training programs and advanced best practices. She is recognized for her ability to align clinical quality with business strategy, design impactful educational content, and implement IPAC programs and operational procedures for large dental organizations.

12:10pm - 1:10pm | Exhibit Hall Lunch Break

Anna Louise Tolan, RDH, FADIA

1:10pm - 2:00pm

Client-centred Periodontal Disease Treatment

Description:

Are you wondering how to manage the stages and grades of periodontal disease in general or dental hygiene practice? You're not alone! Empower yourself with the armamentarium and strategies to effectively manage Stages I-III periodontal disease in your practice. This session offers practical guidance grounded in the latest research and classification guidelines, helping you easily tackle challenging cases.

Anna Louise Tolan

Anna Louise is a trusted advisor, empowering educator and committed to advancing the profession. During her long clinical 40-year career, she has gained expertise in person-centered individualized care, providing and presenting on the non-surgical treatment of periodontal and peri-implant disease and conditions. She is a recognized Fellow of the Association of Dental Implant Auxiliaries, serving as an ICOI-ADIA Dental Hygiene Certification Trainer, an engaging cast member of The RDH View, and a Key Opinion Leader for several Dental Industry Corporations. Most importantly, Anna Louise is empowering her clients and colleagues with the education to elevate oral and systemic health.

Michelle Aube-Simmonds, RDH

2:00pm - 3:00pm

Sterilization Leadership: Leading with Protocol, Not Panic

Description:

This practical and engaging course walks you through exactly what to do when your sterilizer fails, before panic takes over! From interpreting error messages and handling failed indicators to managing quarantined instruments and preparing for potential recalls, you'll leave this session with the confidence to take immediate, correct action. You'll also examine real-world cases, explore root causes of sterilizer issues, and develop a protocol that ensures your entire team knows how to act fast, communicate clearly, and document thoroughly. This course will assist you in building internal protocols that turn chaos into clarity. Whether you're the sterilization lead or simply next to the machine when the cycle fails, this session will transform panic into protocol.

Michelle Aube-Simmonds

Michelle is an empowering Dental Hygiene Speaker, Consultant, and Educator with more than 30 years of experience across clinical, regulatory, and educational sectors. She is a professor at Fanshawe College, maxill's Director of CE and IPAC, and an ODHA Regional Board Director, while also auditing federal correctional facilities and maintaining a clinical practice in London, ON. Recognized with the ODHA Distinction Award in 2025, she is completing a BA in Adult Education at Brock University and is known for her leadership, communication, and dedication to advancing the dental hygiene profession.

3:00pm - 3:30pm | Exhibit Hall Break

Sashi Prasad, RDH, BDS, MBA

3:30pm - 4:20pm

Rethinking Our Approach to Erosive Toothwear

Description:

There is evidence that the presence of enamel erosion is steadily growing, as a result, erosive tooth wear is becoming increasingly significant in the management of the long-term health of the dentition. What is most important is erosive tooth wear factors are identified early and adequate preventative measure are considered when determining an appropriate course of action.

Sashi Prasad

I am a registered dental hygienist with the British Columbia College of Oral Health Professionals. My journey in oral healthcare began at the College of New Caledonia, where I earned my dental hygiene diploma. Building on this foundation, I pursued higher education, attaining my Bachelor of Dental Sciences from UBC, followed by an MBA from the University of Toronto. My career has spanned private practices in both British Columbia and Switzerland. Additionally, I have had the privilege of serving as a dental hygiene clinical instructor, imparting my knowledge and skills to the next generation of oral health professionals. Presently, I am a valued member of the Haleon Canada team, formerly GSK Consumer Health, where I've taken on the role of developing educational presentations for aspiring Dental and Dental Hygiene students. Additionally, I successfully launched the Oral Health Continuing Education platform on Haleon Health Partner Canada. Currently, I'm passionately engaged in a groundbreaking project, dedicated to supporting dental professionals nationwide who generously volunteer their time to bridge the gaps in health inclusivity.

Kathleen Bokrossy, RDH, BSc

4:20pm - 5:10pm

Choosing Your Path: A Strategic Approach to Navigating The CDHO Quality Assurance Program

Description:

Feeling uncertain about which CDHO Quality Assurance (QA) Assessment option is right for you? Unsure of what's required for QA—even if you're not being audited? You're not alone. With four distinct paths available, choosing the right one—and knowing how to stay prepared—can feel overwhelming.

In this engaging and interactive session, Kathleen Bokrossy, RDH, BSc will help bring clarity and confidence to your QA journey. Together, we'll explore the four CDHO Assessment options and guide you through a self-reflection activity to help identify the path that best aligns with your learning style, practice environment, and professional goals.

Whether you're new to the QA process or looking to approach it with more strategy, this session will empower you to see QA as an opportunity for growth—not just a regulatory requirement.

Kathleen Bokrossy

Kathleen Bokrossy, RDH, has been bringing engaging energy to the dental profession for over 30 years. A dynamic and interactive presenter, Kathleen is passionate about driving change and ensures that every program she delivers will inspire dental hygienists to implement improvements in their practice immediately. As the founder and president of rdhu, Kathleen's vision and passion lie in helping to 'Transform the Dental Hygiene Experience' for clinicians, practices, and their patients.

Ozhan Asi, Chief Executive Officer,
TASProvider

Ali Zare, Chief Security Officer,
TASProvider

9:00am - 9:50am

AI in Digital Marketing

Objective:

Give an overview of digital marketing, key channels, and core strategies for online success.

Cyber Security in Dentistry

Objective:

Introduce fundamental concepts of cybersecurity, major threats, and basic practices to stay secure.

Ali Zare

Ali Zare is the Chief Security Officer at TASProvider, specializing in IT and cybersecurity with 30+ years of experience helping dental practices stay secure, efficient, and future-ready. As Chief Security Officer at TASProvider, he guides security strategy, modernizes IT infrastructure, and introduces advanced technologies—from disaster recovery to AI-driven solutions.

Ozhan Asi

Ozhan Asi is the Chief Executive Officer at TASProMarketing, specializing in AI-powered digital marketing solutions for the dental industry. With expertise in SEO, Google Ads, social media, content marketing, and automation, he helps dental clinics boost patient acquisition, improve productivity, and maximize ROI. By aligning advanced marketing technologies with the unique needs of dental practices, Ozhan streamlines operations, enhances patient engagement, and ensures TASProMarketing delivers scalable, results-driven strategies that keep clinics competitive in the digital age.

9:50am - 10:50am

How to Make Marketing Work for You

Description:

Dr. Marketing is here to make sense of the complex world of dental marketing. Most practices we meet are unaware of all the interesting ways to generate patient leads, how a lead can be tracked through a Google or Facebook campaign, or how much a marketing budget should be and what it should be spent on. This lecture will cover common marketing mistakes, rules and regulations the association sets, determining a proper marketing budget, and more. Mr. Bosch will also share strategies of what some of Dr. Marketing's top dental practices are doing across the country. The goal is to ensure dental practices are effectively marketed based on their growth goals and budget and that they meet the ethical standards of marketing a dental practice.

Dr. Brandon Bosch

As a Certified Marketing Expert in both Google and Meta advertising, Brandon has overseen the production of countless websites and marketing campaigns for offices across Canada, the USA, and Central America, and continues to grow Dr. Marketing into Europe and around the world. Brandon has received top designations from both Google and Meta for achieving top results for his clients. Not only has he won numerous awards for his accolades, but he has done so for the last 10 years straight. Brandon continues to be a trend setter in advertising and marketing, and he does so with a focus in the dental industry.

Dr. Brandon Bosch, DDS, CEO of
Dr. Marketing

10:50^{am} - 11:20^{am} | Exhibit Hall Break

Timothy A. Brown, *Broker of Record,
CEO of ROI Corp*

11:20am - 12:10pm

The Master Class to Plan, Control And Execute Your Exit Strategy

Description:

Join Timothy A. Brown Broker of Record & CEO of ROI Corporation as he leads a very fast paced, stimulating and highly controversial discussion about:

- Today's firsthand, owner-operator buyer – why they WILL pay you a premium
- Why banks DO NOT finance all practice sales
- How your premise lease, staff and Associates impact your appraisal
- Corporate Service Organizations – what do they really want to pay?
- Why the Service Organizations are rejected by over 90% of your colleagues
- How we create a silent, sealed-bid competition for your practice to obtain the highest sale price that the market will tolerate
- Why your landlord may prevent you from retiring with dignity and costing you hundreds of thousands of dollars – Demolition and Relocation clauses

Timothy A. Brown

Timothy A. Brown has risen to national prominence as CEO and Broker of Record of ROI Corporation, Canada's professional practice appraiser and broker since 1974. His insights, research and experience has made him a highly sought after professional speaker and a respected author and publisher. As a leading national authority in understanding and identifying the potential of today's market, Timothy has customized presentations that illuminate themes and trends that are of interest to business owners at all stages of their careers.

Tala Batarseh, *Dentala Consulting
Founder*

1:10pm - 2:00pm

Culture and Strategy: How Dental Leaders Can Shape Practice DNA

Description:

By the end of this session, participants will be able to:

- Define the concept of "Practice DNA" and explain the role of leadership in shaping a positive and productive dental office culture.
- Identify the key elements of a strong practice culture and how they influence team engagement, patient care, and business performance.
- Recognize the alignment between practice culture and strategic decision-making for sustainable growth and success.
- Apply practical leadership strategies to foster accountability, communication, and a shared vision within the dental team.
- Outline actionable steps to assess, strengthen, and sustain a thriving practice culture that supports both clinical excellence and business objectives.

Tala Batarseh

Tala is the founder, owner, and operator of DenTala, bringing more than 15 years of experience in the dental industry. She holds a Bachelor of Business Administration and Certificate of Management from York University, a Certificate in Dental Practice Management from the University of Toronto, and has completed multiple CE courses in leadership, sales, treatment coordination, and IPAC standards. Combining her academic background with practical expertise, Tala has guided numerous dental practices in improving operations and achieving growth. Passionate and driven, she continues to partner with dentists to launch new practices or elevate existing ones beyond expectations.

Dr. James Younger, DDS, Author
at TempStars

2:00pm - 3:00pm

The Business Case for Positive Workplace Culture in Dentistry

Description:

Discover how fostering a positive workplace culture can drive your dental practice's success. This eye-opening lecture challenges the notion that being a "tough boss" is necessary for practice growth. Instead, learn how investing in your team's well-being can yield remarkable business returns.

Key topics include:

- Attracting and retaining top dental talent in a competitive market
- Enhancing patient relationships and treatment acceptance
- Boosting productivity and profitability through team stability
- Adapting to current market realities in dental staffing
- Practical leadership strategies for cultivating a positive culture

Join Dr. James Younger, practicing dentist and CEO of a leading dental staffing platform, as he shares insights on aligning your practice's culture with business goals. Uncover the symbiotic relationship between a thriving workplace and tangible business outcomes in dentistry.

Dr. James Younger

Dr. James Younger, is a practicing dentist and as a passionate CEO, the driving vision behind TempStars, North America's leading dental temping and hiring platform. With a career spanning clinical dentistry and tech entrepreneurship, James brings a unique perspective to dental practice management. As an industry thought-leader and innovator in helping everyone in dentistry be happier at work, he's passionate about fostering positive workplace cultures in dentistry. James' expertise in two-sided marketplaces, coupled with his hands-on experience in dentistry, positions him to inspire dental office owners and managers to optimize their dental practice operations and culture for both business success and employee satisfaction.

3:00pm - 3:30pm | Exhibit Hall Break

Adil Kotadia, Partner, MediaNV

3:30pm - 4:20pm

Navigating Practice Growth in Today's Digital World

Description:

Discover how fostering a positive workplace culture can drive your dental practice's success. This eye-opening lecture challenges the notion that being a "tough boss" is necessary for practice growth. Instead, learn how investing in your team's well-being can yield remarkable business returns.

Key topics include:

- The evolving buying psychology of patients
- The importance of reviews, including the do's and don'ts with Google
- How to elevate and stay true to your brand
- Navigating how to choose a marketing partner
- How to set budgets and what you should expect

Adil Kotadia

Adil Kotadia established his first marketing company 25 years ago, primarily collaborating with real estate developers. He earned a degree in design and communications in 2003 from the University of Central England and Alberta University of the Arts.

In 2013, he began working in Dentists. He is now a partner at MediaNV, where he currently works with over 1000 dental practice owners throughout North America.

Cocktail Reception: 5:30 - 7:00pm

PRESENTED BY

Dr. Carlo Biasucci, *Founder of Elite Practice*

Dr. Carlo Biasucci is the founder and CEO of Elite Practice®, the largest provider training and practice growth solutions to dentists in Canada. He is the author of 4 books and over 200 articles on all aspects of dentistry and professional practice. After surviving an injury that almost ended his career, Dr. Biasucci was determined to change his practice from a beast of burden to a business that would allow him to live life on his terms. He took his already-successful \$2.4 million dollar practice, tripled it in 3 years, and cut his work week in half. He now spends 100% of his time sharing exactly how dentists can get off the treadmill of trading hours for dollars, and regaining control of their practice so they can expand personal freedom to finally start living the life they envisioned when entering the profession. His mission is to have a massive, lasting impact on the profession by impacting fellow dentists, their families, teams, patients, and communities.

WHAT ATTENDEES WILL LEARN

- 

Leadership excellence for dental teams
Inspire and guide your team with proven leadership techniques that boost performance, growth, and patient referrals.
- 

Essential KPIs you need to monitor to ensure maximum practice value and return on your time
Focus on the key metrics that predict growth and profitability to manage your practice with confidence.
- 

Practice Transitions: How to get the maximum value for your biggest asset
Understand what drives practice value and take steps now to maximize returns when you're ready to sell.
- 

Turn your hygiene department into the engine of your practice
Unlock hidden profit by using a systematic hygiene recare approach that improves retention and treatment acceptance.
- 

Crafting a new patient experience that drives case acceptance and referrals
Create a patient journey that builds trust, increases case acceptance, and generates consistent referrals.
- 

Building leverage to create freedom of time and money in your life
Work smarter, not harder—implement systems that give you time, money, and freedom.
- 

Marketing that works in today's economy
Learn cost-effective marketing strategies that deliver ROI and avoid wasting money on ineffective channels.

CORE 1 PROGRAM SCHEDULE

RCDSO
|
Royal College of Dental Surgeons of Ontario

Eligibility: To register for the afternoon lecture, you must have completed the “Fundamentals of Dental Recordkeeping” in the morning session, or have previously taken the course on July 31 or October 30 with RCDSO

MORNING LECTURE

9:00am - 12:30pm

Fundamentals of Dental Recordkeeping

Description:

Upon completion of this course, participants will be able to:

- Explain the six components of a patient record that must be included to satisfy professional, legal and ethical expectations for documentation.
- Describe the content that must be included in each of the areas of the patient's record.
- Identify opportunities to strengthen their own practice and apply the fundamental principles of dental recordkeeping required to demonstrate they are practicing to the standard of care.

10:00am - 10:30am | Exhibit Hall Break

12:30pm - 1:30pm | Exhibit Hall Lunch Break

AFTERNOON LECTURE

1:30pm - 4:30pm

Applied Dental Recordkeeping

Description:

Upon completion of this course, participants will be able to:

- Apply the fundamental requirements of dental recordkeeping that demonstrate practice to the standard of care.
- Demonstrate the fundamental elements and content required to satisfy professional, legal and ethical expectations for documentation and explain why deficiencies pose a risk.
- Analyze their documentation and establish a plan to implement requirements of dental recordkeeping that demonstrate they are practicing to the standard of care.
- Evaluate a record to demonstrate proficiency in recordkeeping.

3:00pm - 3:30pm | Exhibit Hall Break

5:30pm - 7:00pm | Cocktail Reception

OUR SPEAKERS

Dr. Peter McDermott, DDS, Associate Director – Quality Improvement and the Implant Coordinator at the Schulich School of Medicine and Dentistry

Dr. Peter McDermott is the Associate Director – Quality Improvement and the Implant Coordinator at the Schulich School of Medicine and Dentistry. He teaches didactic courses in Patient Assessment (Year I) and Diagnosis and Treatment Planning (Year II). He is a clinical instructor in Oral Diagnosis and Treatment Planning and in Prosthodontics at the Schulich School of Medicine and Dentistry. He graduated in 1992 with his Doctor of Dental Surgery degree from the University of Toronto, followed by a Master of Science in Prosthodontics in 2005. Since then, Dr. McDermott has operated his prosthodontics practice in Grimsby, Ontario before returning to teaching. He has previously taught at the University of Toronto, as an Assistant Professor in Prosthodontics. Dr. McDermott is also a Western University alumnus, completing a Master of Arts in Political Science before pursuing his aspirations as a dentist.

Dr. Parvaneh Bahrami, DDS, MSc (Perio), FRCDC, ABP Dip, Board Certified in Canada and US

Dr. Parvaneh Bahrami obtained her Master of Science in Periodontology and Implant Surgery in 2012 from the University of Toronto. Dr. Bahrami is board-certified in Canada and USA and a Diplomate of the American Academy of Periodontology. She is a clinical instructor at the University of Toronto and practices as a periodontist and implant surgeon at Prosthodontics Associates. She is the Associate Director – Quality Improvement and the Implant Coordinator at the Schulich School of Medicine and Dentistry. He teaches didactic courses in Patient Assessment (Year I) and Diagnosis and Treatment Planning (Year II). He is a clinical instructor in Oral Diagnosis and Treatment Planning and in Prosthodontics at the Schulich School of Medicine and Dentistry. He graduated in 1992 with his Doctor of Dental Surgery degree from the University of Toronto, followed by a Master of Science in Prosthodontics in 2005. Since then, Dr. McDermott has operated his prosthodontics practice in Grimsby, Ontario before returning to teaching. He has previously taught at the University of Toronto, as an Assistant Professor in Prosthodontics. Dr. McDermott is also a Western University alumnus, completing a Master of Arts in Political Science before pursuing his aspirations as a dentist.

Dr. Rana Badewy, PhD, FRCDC

Dr. Rana Badewy is a Clinical Lead in the Quality Department at the Royal College of Dental Surgeons of Ontario. She is a Public Health Dentist and a Fellow of the Royal College of Dentists of Canada. She earned her PhD in Dental Public Health from the Faculty of Dentistry, University of Toronto in 2022. She conducts peer/practice assessments, contributes to the development and evaluation of Continuing and Remedial Education courses, and the development, testing, and evaluation of the Practice Enhancement Tool (PET) questions. Dr. Badewy also teaches as an instructor in Dental Public Health at the University of Toronto. She previously worked with the Policy and Programs Department at the Oral Health Branch, Health Canada, where her work informed policy recommendations and supported decision-making at the federal level.
